

FOR FALL WEAR

A complete line of Mackinaws, Sheepskin Coats, Corduroy Garments, sheeplined, cruising Boots, in fact everything for fall wear out of doors.

We have an assortment for the laborer that he cannot help but choose from. All sizes, the best makes at the most reasonable prices.

H. LEWIS,

THE ONE-PRICE CLOTHIER.

WE ARE WELL FIXED ON SKIRTS AND WAISTS

The history of the store never showed as good a line as we show now. They are literally full of style with all the wearing qualities of any season and so low that the most conservative buyer cannot help buying. Starting a fine waist at 75 cents and increasing it three times will get the very best in the store, and so with the skirt deal, they are so cheap that you wouldn't guess the price. We want to have you see them before you do your buying, and we are sure of your trade. Reading this will convince you of its truthfulness. Above is a cut of one style.

SPAFFORD & COLE

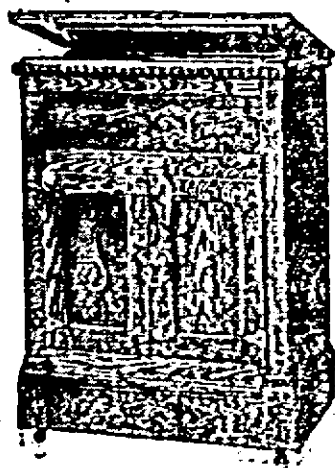

GOOD SMOKE?

It may not have occurred to you that the
CITY DRUG STORE

is headquarters for fine domestic and Havana cigars, yet it is so. Here can be found the mild medium and strong smokes for men. None but the very best brands handled.

PRESCRIPTIONS CAREFULLY AND ACCURATELY COMPOUNDED

F. E. KRETLOW, Pharmacist.

RHINELANDER REFRIGERATORS

—MADE IN—
This City.

The Best Refrigerators on the market, the kind you can clean as you clean your kettles in your kitchen. We sell all sizes here.

LEWIS HARDWARE CO.

SPOONER SHOTS A MAN

Fearing Violence at the Hands of Frank McBurney, Ben Spooner Special Policeman, Inflicts Wound.

Frank McBurney, formerly in the saloon business on Thayer street, hit at St. Mary's hospital with a bullet in his abdomen from the revolver of Ben Spooner, a special policeman. He was taken to the hospital shortly after the shooting and was operated on by Doctors Packard, Garner and Stone. The operation was a difficult one necessitating the greatest care and skill and the man came out from under the effects of the anesthetic administered in good shape. The question of recovery however hangs in the balance as there is said to be but a slender chance for the man to pull through. The bullet passed completely through the stomach and lodged in the muscles of the back.

Like other fatalities, this affair, according to reports, resulted indirectly over a woman, the wife of the man who now lies at the hospital.

Spooner, the man who fired the shot is well known having held the position of dog catcher, special policeman and section at Forest Home cemetery. He has hardly been looked upon as a dangerous man. On Monday morning previous to the happening he had cleaned out and scrubbed the saloon of Otto Krantz as had been his custom. He started for his home, according to his statement, about 6:00 o'clock and went by way of the North-Western tracks as there were two show cars on a siding and he wanted to see what was going on. He met McBurney and two other men before he left the track and as there was considerable ill feeling between the two Ben took his revolver from his pocket in anticipation of impending trouble. The action of Spooner, who, it is said, addressed very uncomplimentary remarks to Spooner, emphasizing them with harsh treatment which caused Spooner to use his weapon with the above result. After being shot McBurney walked some distance to a house nearby, first saying that he had been shot and for some one to send for a sheriff.

Spooner was taken in charge shortly after and his preliminary examination took place in municipal court, the charge being assault with intent to kill.

A. W. Shelton appeared for the defendant and a continuance was asked for and granted, bonds being fixed at \$2,000, which were furnished by H. S. Shepard, Carl Krueger and John Beardon. The case has been continued until Sept. 11, pending necessary developments.

Mrs. McBurney had been working at the Spooner home for some time, and it is understood that her presence there was not to the liking of her husband, who, it appears, did not appreciate the arrangement in the least. It is said that he showed his displeasure often and at times forcibly.

The outcome of the affair is to be regretted.

"QUINCY ADAMS SAWYER"

A Big scenic production, all the scenery being carried.

The scenic equipment of "Quincy Adams Sawyer" which will be seen here Oct. 7, 1903, at the Grand Opera house, is very elaborate and built especially for the production. The managers of the play were determined that nothing should mar the genuineness of the country atmosphere and no expense has been spared in the stage settings.

The backing be scene alone would win fame for the play. The real rest ease, the bliss, the real supper and the natural and humorous incidents attending the features have pleased (immense audiences all over the country.

There is genuine comedy all through the play, and the few touches of pathos are true and convincing. The story is a simple and a sweet one appealing to the heart. There is nothing in it approaching a sillian or an adventures for it is not a melodrama; it is only a wholesome, clearly put picture of New England life, and as such it is a favorite everywhere, in town or city. The play leaves a good taste in the mouth and that is, after all, what the people want.

Accidentally Shot and Killed.

The remains of Willie L. Premo, the youngest son of Mr. and Mrs. Premo of Sault Ste. Marie, Mich., and the grandson of Mr. and Mrs. A. Kinnead were brought here Saturday for burial services having been previously held at the "Soo." Interment took place here Sunday in Forest Home cemetery, prayers being offered at the grave by Rev. C. W. Palmer of the Baptist church.

The young boy was accidentally shot while rambling.

Water Had Partly Expended.

Work on the fall race leading from the wheel pit for the paper mill is progressing rapidly and there is a great change in the appearance of things at the northeast end of the city bridge. Many men and teams have been at work this side of the "Soo" track. A coffer dam has been put in and the west half of the river blocked off in order that the river bed may be lowered about four feet. A large centrifugal pump was put in operation Wednesday morning and by night time the water had all been pumped from within the enclosure. The rocky bottom of the river bed was searched for curiosities and several were found, among them being young catfish, crabs and muskellunge minnows which were taken from between the rocks.

The condition of the territory thus far excavated has fully borne out Superintendent Vinland's first statement regarding what the ditching crew would have to work in. It has been nearly all of the way.

Chinese Kites.

Considerable curiosity has been attracted lately by bright multi-colored objects which have been suspended in midair at heights varying from 500 to 700 feet. The Chinese at the laundry have been sending up the objects which are Chinese kites fashioned to represent the dragons which are prominent features of about everything that comes from the flowery kingdom. The kites are made by the Chinese at the laundry and embrace many patterns.

FACTORY WILL REBUILD

Plant of Wisconsin Veneer Co. Recently Destroyed by Fire Will Be Rebuilt With Proper Encouragement.

There is every likelihood that the Wisconsin Veneer Co.'s factory will be rebuilt, and on a much larger scale, if proper arrangements can be made and Rhinelander men and capital interested in the project.

Mr. H. C. Dayton, the resident secretary and manager of the company has been daily expecting the arrival of Mr. Frost the president and a definite statement regarding the intentions of the company has been withheld pending that gentleman's arrival.

In a conversation with Mr. Dayton today, however, The New North man gathered that this city is looked upon very favorably, and if local business men will take interest in the veneering project there is no doubt whatever but that this city will, within 90 days, after an agreement has been reached, number among its enterprises another factory that will eclipse the old one both as to point of size and number of men employed.

It is understood that Mr. Frost is desirous of centralizing his interests and that it is quite likely that he will drop out of the company.

The company already has two other offers, both good ones which are being considered but the favorable location here and the abundance of basswood and other necessary timber in the near neighborhood makes this point a good one viewed from all sides, everything being equal.

The rebuilding proposition under the new proposed plans will require an investment of from \$50,000 to \$70,000, and a largely increased number of men will be employed. The present location, while fairly good would be improved by one nearer the river where the logs could be more easily handled. As it is, however, the fact that the engine and boiler are in good condition and the hot water rats injured will doubtless result in an enlarged plant on the site of the old.

The Company has worked up a reputation as manufacturers and have had orders galore running from ten to twenty carloads each. Since the fire many orders have come in that have been turned over to other concerns. A well established business has been built up, and according to Mr. Dayton, the prices on the product have raised almost 50 percent, within the past eighteen months.

The company relied, when first starting business here, on purchasing timber from the farmers but owing to the irregularity of supply, the factory did not run regularly. Lately, however, large tracts of timber suitable for veneer, have been purchased outright, and under the new system much more satisfactory arrangements have been made and the steady demand have been reasonably well supplied.

There is little doubt but that, when the company's proposition is put to the Advancement Association, that satisfactory arrangements will be made all around.

Congregational Church.

The subject for next Sunday morning's sermon at the Congregational church will be "What has the church of practical value for the individual," a companion sermon to the one of last Sunday by Rev. A. G. Wilson, the pastor.

LAFOLLETTE WILL SPEAK

Chief Executive of the State Will Deliver an Address at the Fair Grounds Monday, September 14.

Gov. La Follette has accepted the invitation of the Oneida County Agricultural Society to speak here one day of the fair and has set the day as Sept. 14. As a condition he wished it clearly understood that he would discuss questions pertaining to legislation in the state, taxation, transportation charges and the control of government by the people. So far as the executive feels that as he gives his time to this work that he deal with the above questions rather than with general topics in particular.

The judges' stand at the race track has been raised four feet and the upper portion divided off into two compartments, the bottom one for the timekeepers, and the top for the secretary, judges and starter. The stand looks a great deal better after the change and will not be as crowded as heretofore.

Another attraction together with the band concert has been secured for the first day.

Secretary Welch has been in correspondence with an Eastern firm for some time relative to a brand new feature and yesterday succeeded in closing arrangements with the firm for a complete set of day fireworks. The apparatus consists of a battery of Japanese mortars from which bombs are fired toward the sky. The bombs upon reaching a certain height burst and the shapes that come from them assume the forms of beasts and birds of the air. After each explosion tinted clouds hover over the territory covered by the mortars.

This series has been secured at considerable expense to the society and it will be interesting owing to its novelty.

TEACHERS ALL ENGAGED.

Below We Give a List of the Teachers Employed for the ensuing year.

Schools will open in Rhinelander Monday, August 31. The following is a list of the teachers with respective assignments:

High School, building.

E. A. Lowell, principal and superintendent.

Miss Ella McKenzie, Ann Arbor, Michigan, supervisor of music and drawing.

Miss Lillian Moessner, Madison, Wis., science and mathematics.

Miss Edna Leiby, Bayfield, Wis., Latin and German.

Miss Mary B. Swain, Milwaukee, English.

Miss Eugene Wiese, Oshkosh, Wis., English grade.

Miss Louise Crowland, Clintonville, Seventh grade.

Miss Maud Habbington, Whitewater, Sixth grade.

Miss Jennie Pinkerton, Waupaca, Fifth grade.

Miss Belle McQueen, city, Fourth grade.

Miss Cora Halliday, city, Third grade.

Miss May McDonald, city, Second grade.

Miss Caroline Doern, Marshfield, Wis.

Union School.

Miss Ella Vetting, city, Third and Fourth grades.

Miss Elizabeth Markham, city, Second and Third grades.

Miss Charles J. Farris, Fennimore, Wis., First grade.

Miss Edith Brown, Whitewater, First grade.

Common School.

Mrs. Nettie Hamilton, city, Fifth and Sixth grades.

Mrs. Jennie K. Dean, city, First grade.

Miss Ethel Marchant, Fond du Lac, local school.

South Park School.

Miss Gladys Childs, De Pere, Third and Fourth grades.

Miss Elizabeth Finch, Whitewater, First and Second grades.

West Side School.

Miss Virginia Vaughan, city, First and Second grades.

The first teachers' meeting is called for Saturday morning, August 29 at nine o'clock.

New Orchestra for Rhinelander.

The Orpheus Orchestra is a new musical organization in Rhinelander and is headed by W. J. Schlemmer as director. The orchestra numbers at present twelve members, as follows:

W. J. Schlemmer, First violin.

George Wilson, Second violin.

Harry Jentke, Bass viol.

W. G. Hansen, Cello.

H. G. Hansen, Double Bass.

H. G. Hansen, Trombone.

H. G. Hansen, Trumpet.

H. G. Hansen, Piano.

H. G. Hansen, Drums and traps.

Rehearsals have been held for the past two weeks and the orchestra has already reached a high grade of efficiency.

This organization is one that the city needs and every encouragement should be given. Arrangements are in progress for an opening concert which will be given Friday evening, Sept. 15 at the Armory. The latest music has been secured by the director. The majority of the musicians are strangers here who are employed at other lines of business during the day.

Frank Kendrick, night operator for the "Soo" Line at this point, spent Monday at Krasnan.

ENGLISH AS SHE IS WRITTEN.

Foreigner's Amusing Effort to Explain Plan for Helping American Trade.

America is the lodestone which sooner or later attracts the attention of every seer after fame or fortune. News of our advanced business methods has penetrated to the most remote parts of the earth and thousands are anxious to share in the benefits brought by Yankee brains and energy. Haygoods, the well known organization of employment experts, receives many letters from men who wish to represent American firms in their own countries or to secure positions here. The following, received recently from a Portuguese living in the Azores, is certainly one of the most amusing examples of "English as she is written" in existence.

"Please say me if you judge possible the publication of a monthly magazine in Portuguese for advertising of American trade, in Brazil, Portugal and colonies. Germania has two or three of these magazines which are largely distributed among the trade men of these two nations. I believe that it shall be impossible for such a publication without tuition of a board of trade. American trade loose too much by cause this fault. Germania goal are sold like better and cheapest of world, when I have had occasion of verifying that is not truly, even considering freight and custom houses.

"I am a native prof. journalist with special predilection for studies of political economy. I had whom advocate my wishes before The Board of Trade of New York. It would be possible that I get a good position that I can not get in a backward nation. Be kind to consider my idea and write me your opinion or proposal. I knew a spanish magazine published in New York for advertising American trade in the countries where they speak this language.

"I have practice to write and translate the English as the French but I have no practice to speak English. It shall be necessary to receive all orders, mandates or indications by writing at the beginning, I am 30 years of age and they say that I am diligent, intelligent, honest and talented. In any case please send me your plan and booklet."

Summer Cottages at North Pelican

Brown Brothers are building a summer cottage on North Pelican Lake which will cost close to \$5,000. Work has been in progress for some time and when completed the building will be one of the most complete in point of equipment on any of the lakes in this section.

Arrangements have practically been completed for several other cottages which will be built within a year's time.

John Moon has had the land bordering on the lake platted and will endeavor to work up considerable interest in building propositions out that way.

One of the best roads in the county leads to the lake which is the main body of water of the North Pelican chain and there is good reason to believe that the lakes and thoroughfare located northeast of the city will before a year has past be the center of interest among summer resorters in this section.

The largest of the fish tribe are to be found in the North Pelican chain of lakes and some of the largest muskellouze caught in Oneida county waters have been taken there.

The Trotter "Earl C" sold.

Doc. F. Becker, the owner of the well known trotting horse "Earl C" sold the animal last week to Iowa parties. The horse was shipped Monday. The trotter was a general favorite among those who take to racing and his work has been repeatedly cheered at the fair ground track. His gait has always been clean and free from breaks and he was a horse that could always be depended on when it came to a finish race. His mark was 2:14 but he has hit up a 2:24 clip on the track.

That the disposal of so good an animal gives the track followers something to look forward to.

Stage May Build Mill Here.

A. H. Stange, Merrill's honored citizen and well known mill man, was in Rhinelander last Thursday on business. It is persistently being rumored that Mr. Stange will identify himself with the new growth of this city. He owns something like 13,000 acres of timberland in the woods between here and Woodboro and it is said intends to build a mill to turn the logs into lumber. That he will decide upon Rhinelander as the location for his plant is most earnestly wished here, and owing to the splendid shipping facilities it is not improbable that he will so decide. At present he is considering the matter.

School Janitors Appointed.

At the last meeting of the school board janitors for the different school buildings were appointed as follows: High School—John Greenwood. Common—R. Peterson. West Park—E. M. Raymond. East Park—W. L. Lach.

NEW NORTH.

QUINELANDER, WISCONSIN.

The Midway Palace of the St. Louis world's fair is to be known as the "New North." Doubtless more queer things will be seen there than ever came down one before.

Hall stones ten inches in length are said to have fallen in Colorado during a recent storm. This makes the best efforts of the St. Nicholas look like a plugged Canadian nickel.

There is no doubt that the situation in the Balkans is calculated to cause alarm all over the world. Nevertheless, Russia as well as Austria is certain to do all it can to stave off war. Neither of these countries is prepared for serious trouble.

In Massachusetts the state prisons are trying baseball games as a means of exercise and improvement for convicts. It is hard, however, to conceive of a first-class exhibition of baseball when every player is anxious to get out.

Poverty has its compensations. It is to be noted that it is always the "wealthy" farmer who is buying gold bricks or running away with his neighbor's wife or hanging himself or shooting somebody else. The needy agriculturist is presumably too busy hoeing corn to get into such scrapes.

The post office department has ordered that on and after October 1 United States postage stamps over-printed "Philippines" shall not be accepted for postage on matter mailed from the United States and United States postage stamps without the Philippine over-print shall not be accepted in the Philippine Islands.

Some of the St. Petersburg newspapers are assailing the United States because of its interference in Russian affairs, while over in Macedonia the press is denouncing this country for failing to interfere there. It is pretty difficult to please everybody. But the chances are that Uncle Sam will get right along minding his own business.

How familiar the news from Philadelphia sounds! "As a result of the recent fatal collapse of the grand stand in the baseball park the building inspectors will begin an inspection of all the places of amusement." And the next thing to tumble down will be a factory, perhaps; whereupon the factories will be "inspected," and so on, ad infinitum.

It is a pleasure to note the tendency of French anarchists to attack public officers with tomatoes instead of firearms. A tomato landing in the eye of a "despotic tyrant" should afford fully as good an outlet for the frenzied indignation of the anarchist as a bullet through the heart, and it would certainly be more pleasant for all concerned.

Doubtless the most unique spot in Europe is the village of Altenberg, on whose border three counties meet. It is ruled by no monarch, has no soldiers, no police, and no taxes. Its inhabitants speak a curious jargon of French and German combined, and spend their days in cultivating the land or working in the valuable calamine mines of which the village boasts.

The earthquake and volcano eruption reason promises to be a big and lively one. The recent shakeup at Lisbon is followed by very active perturbations in Greece, where a village has been destroyed, and in Italy, and both Aetna and Vesuvius are giving out signs of internal disturbance. This old earth isn't nearly as ready a planet as many who live in its quieter regions may suppose.

By the British revenue cutter firing on an American steamer on Lake Erie the battle of Perry and other naval encounters on that disturbed sheet of water are recalled, though it is not likely that the United States navy department will be very much excited by the incident. If American fishermen go on the wrong side of the line they must expect to be driven out, although round shot is a pretty severe method of ejection.

Chiropractors say that the high heeled shoes now worn by many women have caused a great increase in deformities of the feet and are productive of even more serious injuries. By throwing the body forward and placing it in an unnatural position for walking all case of movement is destroyed and a strain is thrown on the spine that is apt to result in permanent injury. It is not the first time, however, that fashion has prescribed practices injurious to health.

That little unpleasantness over on Lake Erie, when a Canadian revenue cutter fired on an American fishing vessel alleged to have been poaching in Dominion waters, is not likely to have any very serious consequences or plunge two nations into war. The fact seems to be that the international boundary through the lakes is somewhat vague, and there is a reason to fear that the fishing vessels of neither side are over-particular in trying to locate it. But when one of them is knowingly a trespasser it has no ground of complaint because it is driven away.

The proposal to establish a public park in or near the city of Honolulu as a memorial to the late President McKinley will probably be abandoned. Instead of this tribute to the chief executive during whose administration the people of Hawaii became citizens of the United States, it is now planned to erect a McKinley memorial light-house at the entrance of Honolulu harbor. This would be a prominent situation from both land and sea, besides being of great practical utility. The project meets with much favor, and is likely to be carried into effect.

It is intimated that the days of the American mule are numbered because someone has found that a hybrid beast of African origin, and bearing the fantastic name of "mulebra," is to take his place. But those who are making such predictions may not be aware of the qualities of the American mule. These have been proved in many a war campaign, including the recent fighting against the Boers in South Africa, superior to those of any other animal. It can safely be matched against any attempt of the "mulebra" to put him out of business.

A WEEK'S HISTORY

The Important Happenings of a Week Briefly Told.

IN ALL PARTS OF THE UNION

At the Latest News of Interest from Washington From the East, the West and the South.

THE LATEST FOREIGN DISPATCHES

FROM WASHINGTON.

During the month of July last the collections of internal revenue were \$22,165,489, a decrease compared with July, 1902, of \$111,291.

Contraband over Assistant Foreman Miller, of the government printing office, has been revived by the filing of formal accusations by the Bookbinders' union.

The grand jury has resumed its inquiry into the affairs of the post office department.

The post office department, on complaint of Insurance Commissioner Folk, of Tennessee, has begun investigation of use of mails by so-called wildcat companies.

The president declares that no discrimination will be practiced by the government against nonunion workmen, and that the right to form unions is optional with employees.

THE EAST.

Carrie Nation was fined ten dollars in Rayonne, N. J., for attempting to use her hatchet in a saloon.

As a result of the official measurements, the Reliance must allow Shamrock III. one minute and 45 seconds in the America cup race over a 20-mile course.

For \$90,000 Henry G. Weil, leader of Wall street bears, has sold his seat on the New York exchange to A. M. Burden.

At Brighton Beach, N. Y., Don Hatch broke the world's record for paters by pacing a mile in 1:59.

One of the oldest piano and organ houses in the country, the Mason & Hamlin company, of Boston, has assigned, with liabilities estimated at \$1,600,000.

Questions of national concern were discussed by the president and several cabinet officers at Oyster Bay, N. Y.

Because of light wind the first race for the America cup failed, with Reliance 15 minutes ahead of Shamrock III. at the finish.

At the age of 56 years Charles Belcher, known as the inventor of the first oil cooking stove, died at his home in Brooklyn, N. Y.

A monument marking the site of the birthplace of the late President Chester A. Arthur was dedicated at Fairfield, Vt.

At Johnstown, Pa., Robert Snowball shot his wife because she threatened to leave him, and then killed himself.

At Baltimore, Md., the battleship Missouri was successfully launched.

WEST AND SOUTH.

The Nebraska republicans in state convention commend the administration of President Roosevelt and favor his re-election, suggest John L. Webster, of Omaha, as their candidate for vice president, and nominated J. B. Barnes for justice of the supreme court.

The union threatens a railroad expressmen's strike in all railroad centers west and south.

In Detroit, Mich., the body of four-year-old Alphonse Wilmes was found bound, gagged and mutilated.

At Oshkosh, Wis., Thomas R. Morgan, a millionaire lumberman, was shot and killed by Frederick Hampel, a drunken employee, who afterward committed suicide in his cell.

At Angola, Ind., the private bank of Kinney & Co. closed its doors with liabilities of \$142,000.

Near Elk, Wash., forest fires burned over 1,500 acres in a belt of white pine and cedar.

In Chicago a national convention of farmers will be held on September 8 to form a combination to maintain prices and regulate distribution.

The examiner has closed the Citizens' National and Savings bank, of Beaumont, Tex.

In San Francisco 10,000 members of the G. A. R. paraded at the national encampment. In the evening camp fires were held.

After being divorced 41 years, Henry Melville, a Waukegan (Ill.) farmer, and Margaret Brown, of Louisville, Ky., both 70 years old, were remarried in the latter city.

The Bridge and Iron company, at Washburn, Ind., has assigned, with liabilities estimated at \$200,000.

A fence about the Fort Belknap Indian reservation in Montana, which is 40 miles long and 60 miles wide, has been finished after years of work.

At Hanna, Wyo., 16 more bodies of victims of the recent mine explosion have been recovered.

Mrs. Anna Koehn and William Koehn were married at Davis City, Iowa, the first known instance in Nebraska of a man marrying his stepmother.

Booker T. Washington was re-elected president at the fourth annual convention in Nashville, Tenn., of the National Negro Business Men's league.

At San Francisco Gen. John C. Black, of Illinois, was elected commander-in-chief by the G. A. R. encampment, and Boston was chosen for the encampment in 1904.

At Cruzer, Ill., Frank J. Schreiber, said to have served longer than any postmaster in the United States, died at the age of 77 years.

William P. Sullivan, of Missouri, state senator, was convicted at Jefferson City of soliciting bribe for votes and fined \$100.

FOREIGN INTELLIGENCE.

Germany will ask the right to increase the standing army from about 688,000 to 817,000 men.

In Rome Pope Leo's spokesman's report, supposed to have been stolen, was found on his writing table.

The Colombian congress will, it is believed, so legislate with reference to the canal as to make possible the ratification at an early date of a new treaty.

In Havana bids to raise the battleship Maine, the Spanish cruiser Alfonso XII, and the wrecks of other Spanish warships have been advertised.

Leading European powers are negotiating with a view to a joint naval demonstration against Turkey.

The selections made by the czar for the Venezuelan arbitration court are highly commended by Wayne MacVeach, senior counsel for the United States, now in Paris.

Advices from Port Arthur report risings in China which threaten to involve the whole country in conflict.

A force of British wiped out a Nigerian town and killed 700 natives.

Beginning August 31, the annual reunion of the Army of the Philippines will be held in St. Paul for four days.

At Halifax, N. S., a negro who assaulted and murdered Mary Jenkins, aged 13, was hanged by a mob.

The Turkish foreign minister, Tewfik Pasha, notified the Russian ambassador that the porte accepted the Russian demands on Macedonia, and begged that the warships be withdrawn from Turkish waters.

LATER NEWS.

Secretary of War Root has sailed for England. He will act with Senator Lodge and ex-Senator Tupper as representative on the Alaskan boundary dispute.

Samuel J. Parks, the labor leader of New York, was found guilty of demanding money of employers under threat to call a strike.

A horse driven by a farmer at Spring Valley, Wis., dropped dead in the street, scared to death by the cars. As the train came up behind it, the horse jumped and struggled, falling dead just as the engine passed.

Fire at Beaumont, Tex., destroyed twenty-five derricks in what is known as the shoestring district in the Sour lake oil fields.

The war department is arranging for the shipment of 5,000,000 pesos in silver certificates to the Philippine Islands as registered mail.

While the streets were crowded with shoppers a daring thief smashed the show window of a jewelry store at Canton, O., grabbed a tray containing \$2,000 worth of diamonds and escaped.

Major Samuel Reber, signal corps, general staff officer, was detailed as secretary of the army war college.

Konrad von Helldorf, an actor, at Berlin, Germany, was sentenced to nine months imprisonment on a charge of lese majeste in libeling the German emperor in his jokes at the theatre.

If Lieutenant Commander Isam Takeshira of the imperial Japanese navy can carry out his plans Japan will have a yacht in the contest for the America's cup.

John Kilsler, the veteran actor, died in New York.

Bertha Harmon, 14 years old of Philadelphia was killed by being struck on the head by a golf ball while watching the game.

Billy Buck won the \$20,000 purse at Brighton beach.

King Peter of Serbia threatens to abdicate.

Nebraska cattlemen, who have fenced thousands of acres of government land for ranch purposes, have abandoned the fight to maintain the boundaries, and the land will be thrown into ranges.

Six firemen were buried under a falling wall during a fire that destroyed the store of the Luchman Hay company at North St. Louis.

The cooks and waiters in the Chicago restaurants have decided to strike again. The hotels will not be affected.

Allen M. Newman, of Bristol, Mass., was killed in a ball game. He was struck in the head by a foul ball, breaking his skull.

The body of Attorney Albert W. Barnum of Chicago was found in Wall-loun lake, Michigan.

An automobile at Cleveland, O., became unmanageable and ran away down a steep hill. Miss Kilpatrick was killed and three other persons were injured.

Jo Sanders, a negro accused of an attack on a young girl at Henderson, Texas, was shot to death by citizens who went to arrest him. Sanders was standing in his door with a shotgun when the men approached.

In a splendid twelve to fifteen knot breeze, over a windward and leeward course of thirty miles, the American sloop Reliance beat Shamrock III in commanding style by exactly nine minutes actual time, or seven minutes and three seconds after deducting the one minute and 45 seconds which the defender concedes to Sir Thomas Lipton's third challenger on account of her larger sailing plan as at present measured.

Officers of a Russian warship who called at Burgas, in Bulgaria, north of Inada, for provisions, have reported that all the villages along the coast of Adriatic, from the Bulgarian frontier to Inada have been burning for the last three days.

Christ Kiefer, a laundryman at Prairie du Chien, Wis., committed suicide by hanging.

A delicate legal question has arisen in Missouri. A sixteen-year-old girl had her father arrested for spanking her.

TWIN CITY MARKETS.

Minneapolis, Aug. 22.

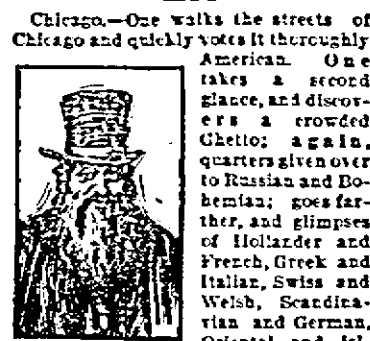

Wheat—No. 1 northern, 87c; No. 2 northern, 85c; No. 3, 83c; Oats—No. 1 white, 75c; No. 2, 73c; No. 3, 71c; Rye—No. 1, 1.15; No. 2, 1.10; No. 3, 1.05; Corn—No. 1, 90c; No. 2, 88c; No. 3, 86c; Beans—No. 1, 1.10; No. 2, 1.05; No. 3, 1.00; Lentils—No. 1, 1.10; No. 2, 1.05; No. 3, 1.00; Peas—No. 1, 1.10; No. 2, 1.05; No. 3, 1.00; Potatoes—No. 1, 1.10; No. 2, 1.05; No. 3, 1.00; Apples—No. 1, 1.10; No. 2, 1.05; No. 3, 1.00; COSMOPOLITAN CITY

All Nationalities Are Found Within Chicago's Population.

WHERE THE FOREIGNERS LIVE

While Thoroughly American It Attracts the Spectator Interesting and Picturesque Glimpses of People from Many Lands.

A Jew Type.

Chicago.—One walks the streets of Chicago and quickly notes the thoroughly American. One takes a second glance, and discovers a crowd of Ghetto; again, quarters given over to Russian and Bohemian; goes farther, and glimpses of Hollander and French, Greek and Italian, Swiss and Welsh, Scandinavian and German, Oriental and Islander. And perhaps these motley folk but make this huge city still more American, for is not America built up in strength and progressiveness from this very admixture of diverse elements?

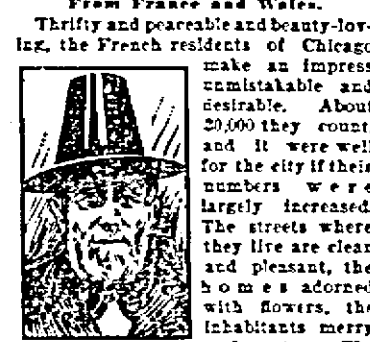

Let us look at some of these foreigners.

Persecutions, and a desire to give their children a better chance than they themselves have had, have caused the Jews to herd in the close quarters of the Chicago Ghetto. Though Chicago is fortunate in her wide territory, giving easy foothold to many thousands of her millions, yet even here there exists a crowded Ghetto. Over 50,000 persons dwell in this quarter, near to the very heart of the city; and doubtless, owing to present active persecutions in Russia, these numbers will presently be greatly augmented. In this quarter the looker-on comes upon Jews of well-known types: old, bent, thin men, with long gray beards straggling over long black silk coats; old women, with great bundles on their heads and gay shawls about their shoulders; push-cart men, old, young and middle-aged; sharp-eyed, sharp-tongued; dark-eyed maidens, displaying amid their poverty the Jewish love of finery; old clothes folk; and, myriads of children. Though everywhere are visible and perceptible the filth and squalor attending overcrowding and extreme poverty, too, everywhere is noticeable good-nature, kindness and helpfulness. And here, while one finds eager ambition for a rise to better conditions, one finds also a true democratic spirit; willingness to lend a hand, and a belief in the gospel of equality. A newcomer is a Jew, well, then, he must be given a welcome and a lift; he be Austrian or Hungarian, Pole or Russian, Bohemian or Roumanian. The Ghetto. It is needless to say, is by no means a locality where sanitary laws are rigidly enforced, but in spite of its dirt and disease one cannot but note the many evidences that the Jews of Chicago find life worth the living.

From France and Wales.

Thrifty and peaceable and beauty-loving, the French residents of Chicago make an impressive and desirable. About 20,000 they count, and it were well for the city if their numbers were largely increased. The streets where they live are clean and pleasant, the homes are adorned with flowers, the inhabitants merry and courteous. The influence of the French in Chicago is being shown in an increase of interest in things artistic, and in a considerable spread of the study of the French language. Chicago has many Jones, and every Jones a Welshman. The Welsh are thrifty, independent, industrious, and their colony, 12,000 strong, ministers considerably to the prosperity of the city. They are great church folk, the church being with them the chief social center. As musicians, they are famed, both at home and in church, taking great delight in the rendering of musical composition. In appearance and speech, they seem unmistakably American, though most of them cling tenaciously to keeping up the ability to use the peculiar Welsh language. They love the old Welsh tongue and institu-

From France and Wales.

A Welsh Character.

French in Chicago is being shown in an increase of interest in things artistic, and in a considerable spread of the study of the French language. Chicago has many Jones, and every Jones a Welshman. The Welsh are thrifty, independent, industrious, and their colony, 12,000 strong, ministers considerably to the prosperity of the city. They are great church folk, the church being with them the chief social center. As musicians, they are famed, both at home and in church, taking great delight in the rendering of musical composition. In appearance and speech, they seem unmistakably American, though most of them cling tenaciously to keeping up the ability to use the peculiar Welsh language. They love the old Welsh tongue and institu-

THE STARS AS GUIDES.

Ingenious Device for Use on Vessels When the Mariners Are Obscured by Clouds.

The stars have always been the guide posts of the sea, but only recently has a device been invented by which they are accurately identified, says World's Work. In an overcast sky they will appear for a moment and then lose themselves behind a cloud. The mariner must by guess or by some diagram of his own work out his location from them. The new invention consists of a star map over which swings a transparent scale, and it revolves from the point located on the map as the north pole. On this scale are engraved the circles of altitude and the lines of bearing. From this map, by a slight calculation, and by revolving the transparent scale until it is opposite certain figures indicated on the map, the ship's location can be instantly taken. The name of this particular star is obtained easily by reference to the nautical almanac by a guide on the chart. This seemingly simple device is already in use on the American line and the Red Star line of steamers, and every new test reports success. It is the result of many years' study and hard labor on the part of Dr. Geislinger, whose idea it is. Even after the working model had been made and found satisfactory a difficulty arose. It seemed impossible to duplicate by any mechanical means the transparent indicator. No engraver could be found who was willing to undertake the work of reproducing exactly the fine lines and figures on this scale, the use of which depended entirely on accuracy. The inventor immediately went at the task of planning a machine that would

tions, but none the less make excellent American citizens.

From Russia and Italy.

From Russia and Italy.

Very few of the 15,000 Russians try for anything above common manual labor, most of them being from the peasant class; but the children of these day-laborers are reaching towards those conditions coveted for them by their parents. The children learn our language quickly, and they, and the different spirit of the new land, are all working towards the uplifting of the many varying folk from the czar's broad domain. Quite unlike the Russian are the Italian dwellers of Chicago, though both are poorest of the poor. Living in dirty, tumble-down, over-crowded houses, they manage to make merry, to carry about with them some of the sunshine of their native land. Most of the Italians now crowded in a downtown portion of Chicago (20,000 in a small area), in Italy were engaged in agricultural pursuits. Here they work as peddlars, at grade work on the railroads, and some rise to the height of storekeepers. There are swarms of children, who are put to work as early as possible. The dire poverty of the family requiring their small aid. The girls and women manage somehow to deck themselves with gay colors and cheap jewelry, and the streets where the Italians abound are picturesque as well as dirty. And one sees among these people many a beautiful girl and handsome youth, both endeavoring to learn the ways and ideals of the land of their adoption.

Hollander and Swiss.

Hollander and Swiss.

The Chicago Hollander is quite a different proposition to the Italian. The former lives in a neat cottage surrounded by flowers and vegetables. Everything, within and without, is spotless, though "the woman" may take part in the field work. And the fruits of her labor are sold in the market.

The Hollanders are engaged in dairy and market gardening. They are thrifty, temperate, religious, and the 30,000 of them living in Chicago are welcome additions, good citizens. The Swiss, too, are desirable immigrants. There are about 10,000 in Chicago; most of them live on the North and Northwest sides of the city, but they are not so closely grouped as are the other foreigners. Like the Hollanders, they own their own little homes. With their large families of healthy, rosy children, their thrift and industry, they are indeed residents worthy of respect. And they seem so comfortable and happy in their new environment; these sturdy mountaineers transplanted from their land of heights and valleys to the flat lands along Lake Michigan.

Greek and Bohemian.

A Greek Girl.

How would Chicago get along without the Greek and his fruit stand? One sees him on every corner down town. With the Greek male the Chicagoan is familiar, but the Greek woman is little known. And for a good reason—a among the 10,000 Greeks in Chicago there are 100 women. The Greek has to seek his wife among the Italians, and occasionally one leads an American girl to the altar. There are many Bohemians in this cosmopolitan city, something near 140,000. The Bohemians are hard-working, proud, though fond of music and dancing. The women with their rich embroideries and earrings suggest the Bohemian love of beauty, while their busy lives speak of the Bohemian habit of industry. Most of the Bohemians own their homes.

KATHERINE POPE.

SUBMISSION BY THE SULTAN

He Yields Completely to Demands of Russia.

LATTER'S FLEET IS RECALLED

Terrible Slaughter of Bulgarians by Turkish-Hungarian Fleet Destroying of Three Villages.

St. Petersburg, Aug. 21.—The Russian Black Sea squadron, which was ordered to Turkish waters, which arrived at Inada, Eastern European Turkey, August 19, to support Russia's demands on the sultan growing out of the assassination of M. Rostkowski, Russian consul at Monastir, has been recalled to Sebastopol, the squadron's point of departure. The recall followed a notification from the sultan that the sultan had ordered all Russian demands to be complied with.

The dispatch received from M. Zinovief, Russian ambassador at Constantinople, announcing that the sultan had yielded completely to Russia's demands, was as follows:

"The sultan has taken the following measures to fulfill the demands of the Russian government: In addition to the condemnation and execution of M. Rostkowski's murderers, and the punishment of their accomplices, those officers who made disrespectful allusions to M. Rostkowski are dismissed from the service. A careful search is being made for the persons who fired at the consul's carriage. All the officials, 24 in number, whose names were handed to the sultan as objects of unfavorable comment by the Russian ambassador are relieved of their posts and handed over to justice. All private persons mentioned in the same list as guilty of various offenses will likewise be tried.

"Khalil Haki Pasha, the chief of police at Palanka, province of Uskob, is restored to his post. The persons under arrest for accusing Mussulmans of outrage and abuse are liberated. Hussein Hilmi, inspector general of Macedonia, is reprimanded. The chiefs of gendarmerie and police of Salonica are replaced. The sultan has ordered the appointment of the gendarmerie of several foreign officers, whose names will be announced later, and finally all the military, civil and judicial authorities have received the strictest orders to take measures to secure order and tranquillity."

The news has reached St. Petersburg from Brussels that the sultan has requested Belgium to nominate four officers for the Turkish gendarmerie.

Salonica, European Turkey, Friday, Aug. 21.—The villages of Boud, Rakoro and Armesko, near Florina, have been bombed and their insurgent garrisons annihilated. At Boud alone 500 Bulgarians are reported to have been killed. The women and children escaped to the mountains. In an engagement at Ostrovo August 19, 14 Komitadjis were killed and 37 were wounded. During another fight near Okrida 217 Bulgarians were killed. An important action is proceeding near Florina. The commandant there demands immediate reinforcements. Twelve battalions have started for Florina from Monastir.

Made Prompt Reply.

Constantinople, Aug. 21.—The sultan's reply accepting the Russian demands was delivered 12 hours after the presentation of the Russian note—a promptitude most unusual in the history of Turkish diplomacy. Tewfik Pasha, the foreign minister, and Naum Pasha, the Russian ambassador, and requested the withdrawal of the Russian squadron from Turkish waters, on the ground that its presence tended to encourage the insurrection. On receipt of a favorable reply from St. Petersburg, M. Zinovief telegraphed the order of withdrawal to Admiral Krieger, commanding the Russian squadron at Inada.

Horrible Atrocities.

Rome, Aug. 21.—Private news from the Balkans contains horrible descriptions of massacres committed by Turkish troops in repressing the insurrection. Whole villages were set on fire and sacked, and men tortured in the worst manner before being killed. Not only women, but even children of both sexes, were brutally assaulted by bashi-bazouks and other cruelties committed, so rampant that they cannot be described.

Massacres Reported.

Sofia, Aug. 21.—Persistent rumors, partially confirmed, are circulating of alarming massacres by the Turks at Monastir. Officers of a Russian warship, which called at Burgas, in Bulgaria, north of Inada, for provisions, have reported that all the villages along the coast of Adrianople, from the Bulgarian frontier to Inada, have been burning for the last three days. Inada is deserted.

A dispatch from Dubowitz asserts that the situation on the frontier is extremely critical, the insurgents having killed several Turkish soldiers at Duenik.

Fighting is reported at 15 places in the vilayet of Adrianople, during which the insurgents are said to have lost 14 and the Turks 200. Heavy fighting is reported at Sreborno, where the troops destroyed the village, and where the Turks are said to have lost heavily from the explosion of dynamite bombs. From elsewhere throughout the disturbed area come continual reports of skirmishes and heavier fighting, resulting in the destruction of several villages.

RECREATIVE INTERESTS.

Fitzsimmons is learning to trip the light fantastic. Mrs. Fitz has taken him in hand and is teaching him to step around. Sir Thomas Lipton says Americans are good sportsmen. They have certainly made good in that branch of sport in which Sir Thomas is most deeply interested.

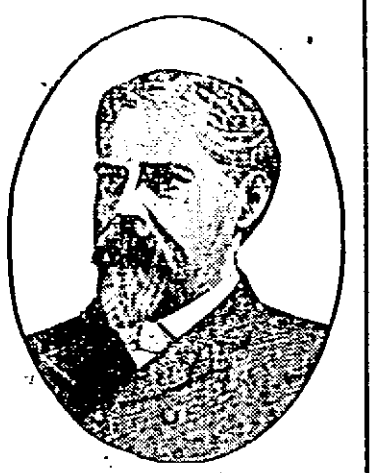

Sir Thomas Lipton has so many nice things to say about the speed of Nelly, says the Chicago Record-Herald, that we suspect he has given orders to begin work on a design for Shamrock IV.

ELECT A COMMANDER.

G. A. R. Veterans Select Gen. Black, of Illinois, for the Honorary Commander of the Order.

San Francisco, Aug. 22.—The Grand Army of the Republic Thursday selected Boston the place in which the encampment of 1894 will be held, and elected the following officers:

Commander in Chief—Gen. John C. Black, of Illinois.
Senior Vice Commander—Col. C. Mason Kresce, of California.
Junior Vice Commander—Col. Harry Kessler, of Montana.

GEN. JOHN C. BLACK.

Surgeon in Chief—George A. Harmon, of Ohio.

Chaplain in Chief—Winfield Scott, of Arizona.

The quartermaster, Charles Burrows, said in his report:

"I am able to show an increase in the grand total cash balance of \$2,317.56, while the inventory of supplies on hand is only \$377.70 less than at last report, being a net increase in your treasury of \$1,939.86 for 11 months, with an estimated amount due for per capita tax of \$500. In response to the appeal in general order No. 2 for aid to such of our comrades as suffered from the floods in the district of Kansas, I received from 259 posts and individuals the sum of \$1,020, which I have forwarded to the department commander, A. W. Smith."

A proposition to admit sons of veterans into the grand army posts was strongly supported, but after an extended debate was defeated by a small majority. The encampment adopted a resolution requesting congress to pass a bill pensioning all veterans who have reached the age of 62 years.

San Francisco, Aug. 22.—The national encampment of the Grand Army of the Republic closed its thirty-seventh annual session Friday afternoon. The newly-elected officers, with the exception of Junior Vice Commander Kessler, who is now on the way from the Philippines, were installed. Commander in Chief Black announced the following appointments:

Adjutant General, C. W. Partridge, of Illinois; quartermaster, Maj. Charles Burrows, of New Jersey, reappointed; judge advocate general, James Tanner, of New York; inspector general, E. B. Wessen, of Iowa.

The encampment unanimously adopted a resolution congratulating Gen. Nelson A. Miles upon his attainment of a distinguished and honorable retirement after a matchless record as a soldier of over 42 years' service.

The formal installation of officers took place, the installing officer being Senior Past Commander in Chief Lewis Wagner, of Pennsylvania.

The closing feature in the evening was a national campfire reunion at the Mechanics' pavilion. An address of welcome was delivered by Maj. Gen. W. R. Shafter, and it was responded to briefly by Gen. John C. Black, the new commander in chief, who received an ovation.

Commander in Chief J. C. Black, after the adjournment of the encampment, received the following telegram from Gen. John B. Gordon, commander in chief of the United Confederate Veterans:

"My hearty congratulations to you and the country. Your election assures unanimous and increased goodwill and closest amity."

Gen. Black responded as follows: "The encampment having adjourned, I have submitted your message to the council of administration, and I am directed by them to acknowledge it and say, as do I, that they fully reciprocate its fraternal and benevolent spirit. God bless our land."

Warship Successfully Launched.

Baltimore, Md., Aug. 21.—The Missouri, a sister ship of the Maine, for the International Mercantile Marine company, was successfully launched Thursday at the Maryland Steel company docks. A great crowd, including visitors from New York, Philadelphia, Washington and Newport News, was present. The Missouri will be ready for her trial trip in three months.

A Wonderful Spectacle.

Naples, Aug. 18.—Volcanic continues active and the eruption has now lasted two weeks. On nights when there is no moonlight the spectacle is magnificent, the crater belching flames and smoke to the height of nearly 4,000 feet.

And Postmaster Dead.

Bloomington, Ill., Aug. 21.—Frank J. Schrieber, said to have served longer than any postmaster in the United States, died Thursday at Cruger, Woodford county, aged 77 years. Schrieber was appointed postmaster during President Buchanan's administration, in 1853, and served continuously for 41 years.

Dobert's Defeat Title.

Newport, R. I., Aug. 20.—The Dobertys successfully defended their title as American doubles tennis champions, winning in straight sets from Collins and Waldner, 7-5; 6-2; 6-2.

Two Drowned.

Holland, Mich., Aug. 20.—John Van Dillan, of Chicago, and Hendretta Wark, of Grand Rapids, were drowned in Black Lake Wednesday afternoon. The boat struck a log and Miss Warkers lost her balance and fell in the water. Van Dillan leaped after her, but as neither could swim they drowned before help could arrive.

West Horrible Fate.

Sacramento, Mich., Aug. 21.—James Budd and Eugene Moss, both aged 15 years, were burned to death here in an electric light tower at eight o'clock Thursday night.

WISCONSIN STATE NEWS.

Marine Labor Day.

Gov. La Follette has issued the following Labor day proclamation: "By authority of law I hereby designate Monday, September 7, as Labor day. With the purpose of promoting the general welfare by the encouragement of friendly relations between all classes of citizens and of impressing upon all the importance and the consideration due labor, it is recommended that all establishments of industry within the state be closed upon that day, and that in every way possible employers cooperate with employees in worthy recognition and becoming observance of labor's holiday."

Murder and Suicide.

Thomas R. Morgan, administrator of the Seventh ward in Oshkosh, millionaire manufacturer and clubman, was shot and killed by Frederick Hampel, an employee, who had been on a prolonged spree and thought he was discharged. Hampel fired three shots, each of which took effect, and then was grappled and held until the police arrested him. A few hours after his arrest Hampel, fearing that the police would not be able to prevent a lynching, hanged himself by his suspenders in his cell.

Will Prosecute Italian.

Attorney General L. M. Sturtevant will shortly tackle the leading railroads of the state in a series of prosecutions against the Chicago, Milwaukee & St. Paul and the Chicago & Northwestern companies for the alleged importation by these roads of branded and range western horses in violation of the Wisconsin law. This importation is alleged to be threatening to the stock of the entire state, because of the prevalence of glanders in the imported animals.

Killed in a Well.

While Mrs. Gustaf Forst was washing some milk cans at a well near the house in New London suddenly the ground upon which she was standing gave way and she fell into the well, which was 55 feet deep. In falling she pitched head first into one of the cans she was washing and was found in that position, buried in debris that had fallen in the well. It was nearly two hours before the body could be removed.

Ready to Shoot.

Three attempts have been made to blow up the home of H. C. Reynolds, a farmer living near Maithers. Mr. Reynolds has bought a supply of ammunition and has caused a warning to be published in newspapers that anyone caught around his home after dark will be "riddled with bullets." Neighbors are cautioned to give warning of their coming.

Didn't Like the Tune.

William Hill, a farmer living about four miles west of Colfax, was shot and killed by C. E. Eaton, also a farmer. Mr. Eaton was driving by the Hill farm whistling. Hill, objecting to the tune Eaton was whistling, called on him to change it. A quarrel ensued, and Eaton drew a revolver and shot Hill dead. Eaton gave himself up.

The News Condensed.

William W. Minkie, of Oconomowoc, has received notice that he is one of the heirs to an estate valued at \$25,000,000 left to the Minkie family by the death of a distant relative in Holland.

A freight train on the St. Paul road was wrecked at Somers by the breaking in two of one of the cars. No one was injured.

A. L. McPherson, a carpenter at Oshkosh, has fallen heir to a \$100,000 estate in California.

Bert Goff, of Badleyville, aged 25, was arrested in Eau Claire on the charge of stealing stamps from the post office there. The stamps were sent to a Chicago mail order house for a bicycle.

Cornell university has sold to the South Wisconsin Lumber company, of Muskegon, Ia., upward of 12,000 acres of hardwood timbered lands in the southeastern corner of Sawyer county, for \$100,000.

Wenzel Sladky, a retired hotel keeper at Manitowish, hung himself in his barn.

Michael Stant, a Two Rivers man, was committed to the Northern Hospital for the insane at Oshkosh, the fourth time within fifteen years.

The Lake View Beach hotel at Sheboygan, owned by the Babst Brewing company of Milwaukee, was destroyed by fire. The hotel will not be rebuilt, but cottages will be put up instead.

The Wisconsin State Cranberry association's picnic in Grand Rapids was attended by over 500 people.

Rosa Miller and Mary Black, the two Chicago girls in jail in Milwaukee on the charge of burglary, pleaded guilty and were each sentenced to a year's imprisonment in the house of correction.

Owners of cattle are making an effort to find the source of poison that has been placed in the ponds in Kenosha county.

Benjamin F. Sweet, aged 72, ex-mayor of Fond du Lac, and president of the B. F. & H. L. Sweet wagon works, is dead.

Gold bearing quartz in paying quantity is said to have been found on the premises of Patrick Gaffney, at Eagle River, by well diggers while they were drilling there. The find was about 50 feet below the surface.

The business portion of the town of Amberg, Marinette county, was wiped out by fire. The loss is about \$20,000, half covered by insurance.

The official report of the annual inspection of the Wisconsin National guard by Capt. John P. Morrison, Twentieth Infantry, U. S. A., says he considers the National guard of Wisconsin as a whole an efficient body of troops.

Lawrence Doty, of Chicago, and Miss Jessie Brown of Janesville were drowned in Geneva lake by the upsetting of a small boat.

Company G of the Second regiment at Appleton has begun to solicit subscriptions to build a new armory to cost \$15,000.

Fire, supposed to be of incendiary origin, partially destroyed the west wing of Concordia hall in Menasha.

The city council of Waupun has passed an ordinance regulating the speed of automobiles and motor cycles not to exceed six miles an hour and fixing a penalty of \$5 to \$100 for each offense.

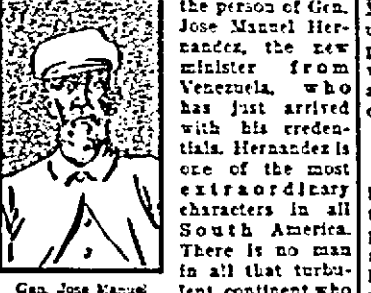

WASHINGTON STORIES

Glimpse of Life and People at the Nation's Capital.

HERNANDEZ, THE MAIMED ONE

Extraordinary Character of Venezuelan Minister—Mrs. Cushman K. Davis' Marriage Causes Stir—Marine Band Growing Old.

Washington.—Washington is to have an acquisition to its diplomatic corps this winter in the person of Gen. Jose Manuel Hernandez, the new minister from Venezuela, who has just arrived with his credentials.

Gen. Jose Manuel Hernandez.

stomy career. He has gone through so many perilous experiences that he is commonly known in his own country as "El Mocho" (the maimed one). He has followers who would obey his slightest call even though he led them to death, and yet he has little impressive or inspiring about the ordinary observer—just a plain, unassuming, rather shabbily dressed South American.

Hernandez has been a revolutionary ever since he was 29 years old. He got his first taste of powder away back in 1863, and there has been few years since then that he has not spent more or less time in the field. Venezuela has not had a president in all that period whom Hernandez has not tried to overthrow. His last attempt was against the present President Castro, whom he has been fighting ever since Castro seized the reins of power up to a very short time ago.

It was only two days after Castro ousted Andrade that Hernandez raised the standard of revolt against him, and less than a year ago the beaten leader was wearing 60-pound shackles and subsisting as best he could on banana peels while suffering the imprisonment that Castro had sentenced him to. Had it not been for the joint attack of Germany and England on Venezuela last summer Hernandez would probably still be in prison. But in the face of the country's peril he was liberated by Castro, and he is now regarded as one of the Venezuelan president's strongest supporters.

Mrs. Davis a Bride.

No happening in Washington as good many months has caused more comment than the announcement of the marriage of the widow of Cushman K. Davis. For in the past 15 years there has been no woman in the capital who was more generally known and in whose personality greater interest was shown. The circumstances of her marriage to the late chairman of the foreign relations committee, the social feud which that marriage inspired, the political fortunes which it made and marred, all conspired to lead to it a romantic interest. Added to this was the interest which attached to the woman herself in the long period of her social prominence in Washington.

It was as Mrs. Cushman N. Davis that she held her place in the life of the capital, and it will doubtless be by the same name that she will be referred to hereafter, in spite of the ceremony which has made her Mrs. Hunter Dull. While Senator Davis was alive his wife played a conspicuous part, and this was especially true after he became chairman of the foreign relations committee, which carries with it a certain social prestige belonging to no other chairmanship in either senate or house.

When the Davises went to Paris at the time of the meeting of the peace commission, of which the Minnesota senator was a member, Mrs. Davis became easily the most conspicuous of the women attached to the mission, and her doings were chronicled on both sides of the Atlantic throughout the time of the sittings. Her receptions were the most crowded, and the number of notables in her train was greater than that of any other American woman. Of course, this sort of thing aroused jealousy, and of course, there has been any amount of talk among Washington women, but the object of it all has gone about enjoying life in her own way.

Marine Band Celebrates.

The oldest musical organization in the United States has just celebrated its one hundred and fifth anniversary—for that is the venerable age of the United States' marine band, which comes very near to being the oldest of the American government what the various royal and court bands are for the different capitals of Europe. The Marine Band of Marine Land has done more for the cultivation of the right sort of musical taste in a popular way than any other organization in America, and yet it has always been compelled to labor under the greatest conceivable disadvantages. It is stationed in Washington at the marine barracks.

Its members are all enlisted men in the marine corps, including the leader, who by special commendation, is allowed the pay and commutation of a lieutenant. They are all, including the leader, subject to the discipline of the corps, and with the exception of the leader none of them receives higher

pay than a private in the corps—\$13 a month.

The only way in which it had been possible to maintain for so many years the superlative quality of the organization is by the dispensation that members may secure engagements privately to the extent of a beryllium income, and the musical unions have been so bitterly opposed to this that the band has had to fight its way against prejudice and narrowness for many years.

Only a few days ago, when they were engaged to march in the "Elk" procession in Baltimore, the members of the union threatened to strike and leave the procession without any other music than the Marine band unless the contract was annulled. However, the contract was adhered to, and the band played on. It was as leader of the Marine band that Sousa made his reputation as the march king. He composed his most famous pieces of music while drawing a salary of \$1,200 a year as an enlisted man in the marine corps.

Newspaper Men and Scientists.

The interesting contest which has been going on down the Potomac between the newspapers and the scientists, who have been experimenting with Prof. S. P. Langley's aerodrome, has had rather an exciting denouement. For a month the newspapers have been on the offensive, and Prof. Langley, during the same length of time has kept himself and his machine as much a profound secret as possible. And now the machine has been seen and judged from its antics is more of a fish than a bird, for it made straight for the water after beginning its flight. Prof. Langley has been at work on his invention for over 20 years. He is an old man now and if after the damaged machine is repaired it should still refuse to fly it will prove bitterly disappointing to him. He has devoted his best energies and beside has spent \$50,000 of a government appropriation made for military purposes in his endeavor.

About a month ago he sent his apparatus down the Potomac in the keeping of a party of scientists and machinists, there to make the all-important trial under the most approved conditions. They have a houseboat from which the machine has just made its disastrous flight and all sorts of other paraphernalia. In their trail went representatives of every important newspaper in the country. The scientists have devoted themselves to keeping out of the way of the reporters. They have been living at the Mount Vernon Ducking Club, of which Prof. Langley is a member, and they have relentlessly driven out everybody who ventured too near the sacred precincts. Now it happens that there are other members of the club than Prof. Langley and they resented this monopoly by the scientists to the exclusion of everybody else. Consequently one of these, Truston Beale, who was once United States minister to Persia, notified the professor of his intention to occupy the club with a few of his friends and the friends he chose were the newspaper reporters who had hitherto been kept out in the swamp. Then it was the scientists who had to shift for themselves.

So much for the contest which had almost eclipsed the interest in the flying machine itself.

Prof. Langley's Airship.

As for the latter much of the mystery—a mystery which has been purposely intensified by those having it in charge—has been cleared by the view which was obtained from the press boat, which was more than 20 feet from the houseboat when the aerodrome left it in its aerial flight. It is constructed on the principle of the acroplane, being equipped with four wings, two on each side. These wings are about four to six feet in dimensions, made of the finest oil silk and held upon delicate wooden rods. The wings are in the shape of a test. The body of the machine consists of an intricate arrangement of fine steel rods, with the cylinders, motor and boilers carefully balanced thereon. Between the two sets of wings are placed the propellers which are two in number, each fitted with two blades. The steering gear is situated in the rear and is constructed from materials similar to that of the wings. The motor carried by the machine is supposed to generate something in excess of two-horse power.

According to all the scientists there is no question about the ability of the machine to remain suspended in the air after it has once got a start. While the machine is being repaired the same profound atmosphere of secrecy, which even a newspaper man is not able to penetrate, prevails about Prof. Langley's houseboat, and the next thing is awaited with unabated interest.

LOUIS A. COOLIDGE.

Too True to Nature.

Hostess—All the mechanical toys you make seem to be very successful.

Inventor—Yes. I've only had one failure.

Hostess—What was the matter with it?

Mrs. Anna Morrison and daughter came down from Ironwood yesterday, after spending several weeks there with relatives.

Mrs. Chas. Mustard returned last night to her home in Pelican Lake, after a visit here with the Russell family on the south side.

The Marks family leave for their home in Olanah, Wis., tomorrow, after an all summer's outing at their cottage at Lake George.

Brooks Edwards, formerly of this city, but for the past year of Tacoma, Wash., arrived in the city yesterday for a few weeks' visit with friends.

Mr. and Mrs. Thos. McElmott, Jr., returned Sunday morning from New London where they attended the fair and visited friends and relatives.

Bert Watts came down from State Line Tuesday night where he is looking for Mather Brothers. He will return after spending a week or two here.

Miss Lulu Raymond is in Tomahawk this week where she will shortly present the play "Esmeralda," which will be put on by her there, she left here Monday.

The Sunday evening subject at the Congregational church by Rev. A. G. Wilson will be "Boasting and Boasting." A remedy will be suggested. Service at 8 o'clock.

Pat Hickey died at the hospital Monday of typhoid fever. He had been under the care of the sisters for three weeks. Hickey was a workman and had no relatives here.

F. J. Warner of Spooner was in the city yesterday on business connected with the North Wisconsin Home Association, an incorporated company doing business under the laws of the state.

Harry Slossen of The New North force, who has been spending the past week with relatives and friends in Minneapolis, Stevens Point, Ogdun, Prentice and Oshkosh, returned Tuesday evening.

Gay W. Ogden arrived here from Madison yesterday. He was on his way to Sault Ste. Marie, Mich., for a visit with his parents. Gay formerly attended the High school here. He is the son of Mr. and Mrs. W. C. Ogden.

Corbin, the Great, and Thelma the Mystic, will give a benefit entertainment at the Armory commencing Monday, Tuesday and Wednesday of next week. Both are artists of national reputation and the fact that they will appear here is a matter for congratulation.

A few of the county schools commence next Monday morning but the majority of them will not begin until a week from that date. The teachers have now been all engaged and all except three are residents of this county. Oneida county has also supplied many of the neighboring counties with teachers for the coming term.

R. Ripple was over from Milwaukee last Friday.

E. P. Holmes of Wausau was in the city last week.

Paul Modter of Wausau transacted business here Thursday last.

Mrs. P. B. Stewart is visiting friends in Superior and Duluth this week.

Edward Brazill, Sr., and Edward Brazill, Jr., were visitors here last week.

Miss Francis Quinlan made a short trip to Monkeo Saturday returning the same day.

Miss Helen Alban is entertaining her friend, Miss Marie Johnson, of Wausau this week.

Dr. Stewart was called to Woodruff by a telegram Saturday announcing a dangerous case of sickness.

H. W. Boyer of Merrill was in the city Thursday of last week. He was on his way to Hurley and Ashland.

Miss Jennie Rhoad returned Saturday from a visit of three weeks with relatives and friends in Muskegon.

Dr. P. B. Stewart is entertaining his brother, J. A., this week. The latter is a student in the University of Wisconsin.

Miss Margaret Goodwill returned to her home in Plover last Friday, after a two weeks' visit at the home of her aunt, Mrs. Antoine Rheunne.

Al. Hafner was down from Three Lakes over Sunday. Mr. Hafner has charge of the lumber interests of the J. H. Quail Co. at that place.

Miss E. H. Washburn left for State Line Saturday to join her husband, who is employed as locomotive engineer by Brown Bros. Lumber Co.

Joseph Flynn visited with friends in the city last week Friday and Saturday. Joe is now practicing law at Ell Lake on the Wisconsin Central line.

George B. Thomas came down from Milwaukee last week and before returning was initiated by Rhinelander Aerie No. 33, F. O. E. He was able to fly back.

Mr. and Mrs. Jack Harrigan passed through here Saturday afternoon on their way to Manitowish, after having spent nearly a week at Antigo and Grandon.

T. B. Melndoe and wife, W. T. Stevens and wife and N. T. Baldwin and wife left last Friday for the Ontonagon fishing country where they fished for the gamey trout.

John McElmott returned to Manitowish Saturday, after spending a few days in this city with his family. John is a camp foreman for W. D. & J. Harrigan at the above place.

John Gray of Manitowish spent a few days in Rhinelander last week. He was accompanied on his return Saturday by his sister, Mrs. W. D. Harrigan, who spent Sunday there.

The insurance adjusters were in the city last Thursday and Friday adjusting the loss on the plant of the Wisconsin Veneer Co. It is understood that the companies allowed the insurance on the property burned in full.

Sheet music. All the standard and up-to-date instrumental and vocal selections. Over 2,000 copies to pick from at C. A. Carling's piano and music store in the opera house block.

Miss Florence Wilson leaves tomorrow night for Valparaiso, Ind., where she will take a thorough course in music in the Normal school at that place. She will be joined at Chicago by Miss Laura Horn, who will take a business course in the University.

Ed. Peterson, who has conducted the restaurant in the Faust building at the corner of Third and Brown street for several months past, sold out the first of the week to John Shore and Edward Belongie.

Mr. Peterson has accepted a position as cook in Tom Boy's camp at State Line and will leave for that point tomorrow to assume his duties.

Dr. S. H. Stone left for Milwaukee Tuesday night where he will attend a special meeting of the head officers of the Independent Order of Foresters. The high official of the order the Hon. Dr. Oranbytkha of Toronto, Canada will be present. Doctor Stone is the High Physician of the order in this state and has held the office three terms.

W. McEachin of Carver is in the city this week. The gentleman has purchased the Ira Cass home and will soon move his family here and take up his residence there. Mr. McEachin has been connected with the Ray Shore Lumber Co. for some time. The fact that he and his family will make Rhinelander their home is news that The New North is glad to chronicle.

Mrs. B. F. Jilkson of Monkeo visited friends here last week.

Mrs. Jno. Collins has returned from a visit at Marquette, Mich.

Long, the Auburn haired grocery salesman, was in town Monday.

Attorney John Karmen was in Philippi last Friday on legal business.

Lewis Kelley went down to Clintonville last night to visit relatives.

A. Dalgle, the Monkeo hotel man, was in the city last week on business.

Bert. Pridle visited at his home in Appleton the latter part of last week.

August Richter is up from Milwaukee today looking after land matters.

A number of the boys attended a dance at Pelican Lake Saturday evening.

"Bud" Leadbetter and Philip Saur fished at Tomahawk Lake the first of the week.

Charles Ball, E. M. Markham and Will Rheunne spent Sunday afternoon at Woodboro.

Dan J. Shea, the Merrill logger, was in Rhinelander last Friday looking after his interests.

Two furnished rooms for rent. Inquire upstairs over Carlson & Anderson's store on Brown street.

Mrs. Mary Jennings, headsake lady in Solberg & Kolden's store, was indisposed the first of the week.

Mrs. Frank LaMere and two children returned Monday from a long visit at Marinette and Milwaukee.

Will Abbott, stenographer for Silverthorne & Co., spent a part of last week at Grandon on a fishing trip.

Miss Jessie Brock returned to her home in Minneapolis this morning, after a week's visit here with friends.

Mrs. Kate Dicker and daughter, Miss Nellie, returned last week from a visit with friends in Duluth, Minn.

George Kelley arrived in the city this morning from Sault Ste. Marie for a few days' visit with his parents and friends.

Ben Sweet of Milwaukee greeted his many friends here last week. Ben wore a pleased smile on his face that was good to see.

Miss Edna Newbre returned to her home in Chicago last Saturday, after spending a week here, the guest of the Mises Browns.

Mr. and Mrs. P. E. Seibel and family, the Mises Mary Seibel, Kate Seibel and Mary Jennings spent Sunday at North Pelican.

Miss Josephine Latham, bookkeeper for C. B. Fride, left Tuesday for Oshkosh where she will attend the Yacht Club regatta.

Mrs. C. A. Hodgden and children were guests at the home of Mr. and Mrs. L. W. Schussman at Eagle River Saturday and Sunday.

Mrs. O. B. Brush returned to her home in Chicago last week, after a visit of two weeks at the home of her sister, Mrs. E. M. Kemp.

Ralph Brown left Monday morning for the State Line country, where he will look over a tract of timber for Brown Bros. Lumber Co.

The torrid wave which was predicted for this section by the weather man has not yet come along but we are waiting patiently for it.

Miss Segna Segerstrom very pleasantly entertained a number of her young friends at her home on Brown street last Thursday evening.

E. A. Edmunds left for Minneapolis Sunday night and from there will go to Chicago on business connected with the Rhinelander Paper Co.

Mrs. Germond, mother of Miss Myra Germond, returned to her home from New York state where she has spent the summer with relatives.

Harry Zona leaves next Tuesday for his home in Appleton, after having spent the summer here in the employ of the paper company as time-keeper.

I have houses and lots for sale on every town in every part of the city. Anyone with city property desirous of selling are requested to call or write. MATT STAPLETON. 1924

Mr. and Mrs. James Howe came up from Milwaukee Sunday for a visit with Mrs. Howe's sister, Mrs. Geo. Horn at the Oneida House. Mr. Howe is one of the editors of the Milwaukee Daily News.

Miss Mary Seibel and Miss Kate Shear returned to their homes Tuesday morning. Miss Seibel to Hildburg, Minn., and Miss Shear to Two Rivers, Wis. Both young ladies visited while here at the home of P. E. Seibel.

The familiar face of ticket agent Chapman is missed from behind the window at the North-Western depot office this week, he being away on a vacation of two weeks. While gone he will visit Green Bay, Milwaukee and other cities.

A petition is being circulated by A. O. Hilderbrand this week among the citizens, asking that he be allowed to go on with the building of the new iron clad addition to the Grand opera house stage, as this is in the nature of a public improvement desired by a majority. The petition has been generally signed by representative business men and it is thought will carry weight with the city fathers.

Wm. Tomalty came down from Merrer Monday where he has been employed for several months past by Brooks & Ross in Pat Shay's camp. William has been working with the crew on the hoist there and last week met with an accident which nearly laid him out. One of the chains used on the logs to secure them snapped and a broken section flew back and struck him in the breast badly bruising him but fortunately breaking no bones.

Paul Browne left for Chicago last Monday.

Dr. Harris of Lac du Flambeau spent Sunday in this city with friends.

S. H. Ashton and brother of Winchester, Ind., fished for trout in Prairie River Friday last.

George Hilderbrand left Saturday night for a two weeks' visit in Milwaukee, Chicago and West Baden.

Mrs. Elshoff of Ashland arrived here last week for a visit at the home of W. H. Gilligan. Miss Dolly Elshoff has been visiting here for a month past.

The State Fair to be held in Milwaukee, September 7th to 15th, bids fair in point of general and special interest to exceed any fair yet held in the state. Half fare on all railroads.

Prof. J. E. Coleman of Evansville, Wis., will be here Thursday to hold the quarterly meeting in the Free Methodist church. Meetings every evening at 8 o'clock till Sunday, also at 10 a. m. Sunday. All are invited.

F. S. Robbins, F. H. Johnson and E. J. Yapp left Thursday last for Oshkosh where they will appear as witnesses for the plaintiff in the case of the Brown-Robbins Lumber Co. vs. the Oshkosh Log & Lumber Co. The case is called. It is understood, for the recovery of \$12,000 due the Robbins Company for saving logs of the defendant company in the Robbins mill at Robbins, Mich.

W. L. Beers was down from Sault Ste. Marie the latter part of last week. He announced that he in company with P. P. Stollman had disposed of their store business there and that W. C. Ogden formerly of this city had purchased the interest of A. M. Rogers in the farm machinery business of Rogers & Shafer on the American side and had moved over from Canada.

Ray LaSalle, Web Brown, Jr., Jno. Watring, E. H. Melkjohn, Luther Brown, T. C. Wood, Chas. Melndoe, and the Mises Cora Holliday, Nettie Tibball, Marie Johnson, Gertrude Moe, Edith, May and Helen Brown made up a party that went up the Wisconsin River Saturday in the houseboat "Mary Ann" which was in tow of Luther's launch. The day was perfect and the trip proved very enjoyable.

Sault-Welles Wedding

The marriage of another one of Rhinelander's former corps of teachers took place at Minneapolis last week when Miss Hattie E. Welles was married to Mr. S. H. Soule. Miss Welles held the position of nurse and drawing teacher here. Mr. Soule the groom is interested in mining in Deadwood, South Dakota, for which city the newly married couple left on a wedding trip after the ceremony.

Emma Mack's Winner

At the fair held at New London last week "Emma Mack," the trotter owned by Jas. Lawlis of this city, won the 224 stake race, (\$500.00) for trotting, the time being 2:21. The horse was driven by Will Lawlis. Will drove the horse "Wedding Eds" in the 224 stake race and narrowly escaped serious injury, as the horse fell while making a turn, throwing Will to the ground. It was a narrow squeeze.

Goes to New York

D. H. Walker left yesterday for New York City where he will attend the grand lodge meeting of the Fraternal Order of Eagles as the representative of Rhinelander Aerie No. 33. David is the Past Worlthy President of No. 33, holding the position by appointment through State Deputy Grand President Abraham of West Superior when the local lodge was organized. He will use his best efforts to have the national home for aged and infirm members of the order located here among the pines. He carried with him several hundred cards which will be scattered around where they will do the most good, each containing a suggestion as to the fitness of Rhinelander as a resting place for indigent members of the winged order. It is hoped that he will succeed in his mission.

Fast's New Invention

Casper Faust has lately shown that he has considerable inventive genius about him that even his friends knew nothing of. His latest effort has been put to a practical test in his own residence and in Dufrain's and Nicholson & Gustafson's kitchens. The invention pertains to the saving of fuel in stoves and furnaces and also to the ventilation of buildings. The changes are wrought by means of a patent chimney which Casper states will save from 20 to 30 percent of the heat that under ordinary circumstances passes from the stove or furnace to the outer air.

In a room through which a brick chimney would pass Casper has arranged a section of heavy hipped tin that extends from floor to ceiling and is set into the side tiers of brick. At the bottom he has arranged a draft section which can be opened to allow of the passing of foul air, and at the top there is a damper with which the amount of draft in the chimney can be regulated. With the new chimney there need be no check drafts on the stove, the action of the fire being regulated entirely by the chimney.

Casper reasonably theorizes that the heat that ordinarily passes through a chimney and is wasted will, with his patent, be largely utilized and save at least 25 per cent. in the amount of fuel consumed.

He has patented the appliance in both the United States and Canada and is almost anxious that winter may set in that the correctness of his theory may be demonstrated.

CAPES, COLLARETTES, BOAS, COATS AND SCARFS

We have our fall line of Shoes in and can fill any order as to size and quality.

SOLBERG & KOLDEN.

THE LOVE OF LATER YEARS.
What of the strong man's stubborn passion?
When love comes slapping and low?
What of the long-standing passion?
When love comes slapping and low?
From habits that enslaved before
He turns as a new-born, to sigh,
His dream of love has been more,
His gun and not uncharitable.

The thunder of applause that shook
The hall of state for him are all
Forgotten when he turns to look
And when he hears her softly call:
The wisdom that he had to lose
Aids, forgetting to be wise,
He comes to know that her praise,
His universe is in her eyes.

What of the strong man's solid reason?
When love comes slapping and low?
To noble heights or down to treason
He follows on submissively.
From that which armies might have tried
He turns to move him he needs,
And as a positive woman's side
The strong man sighs and humbly pleads.

The dreams that young love dreams are
Fair,
The rights that young love rights are
Sweet.
Glad as a boy, young love, where
The lips of young love meet,
The smiles above young love are blue,
The laughter of young love is gay,
To you love all the world is new
And all the troubles far away.

But send to me the sweeter, later,
Love, blossoming where sorrow lies,
The deeper love that grows in grief,
That comes to you but not to die,
For him, when youth's wild dreams are
Gone,
And time has withered many a hope
God's gift is best if love is true.
To lead him down the western slope,
—S. E. Kiser, in Chicago Record-Herald.

Tales from the Knob Country

"THE Knob country lost its leading and most valuable citizen when Uncle Jasper died," remarked the man from that storied part of the Knob country wilderness that lies back of Lackawack. "Why, Uncle Jasper could actually smell bears, Uncle Jasper could and when it came to wild cats, why, gosh all hunkel! he was like a prophet of old!"

"One time I hadn't seen a wildcat in two months, and I wanted a couple the worst way. Seemed as if wild cats had all left the country. So one day I was passing along by Uncle Jasper's and I asked him where all the wildcats were."

"He said he hadn't thought nothin' about wildcats for a good while."

"Why," says he, "do you want some?"

"—Only a couple," says he.

"—Lemme see," says he. "This is along in November, he says."

"—Thea he looked around at the weather, and seemed to be considerin' the matter, how they was fallin', and then he says:

"—Well, Dan'l, he says, 'I see by the way things look that there's a couple of wildcats down back of the swamp yonder,' he says, 'and I'm glad you come along,' he says, 'cause I wouldn't 'a' thought nothin' about wildcats if you hadn't come along,' he says, 'and then two wild cats 'a' been up here and played hob with my chickens to-night, sure!' he says, 'I wish you'd go down and get 'em,' he says, 'but you won't get 'em both if you don't act right, for they ain't together!'

"—Who don't just yend the big tamarack first," he says. "There, in one of them tamaracks, or high it, you'll run agin one of them wildcats," he says.

"—It'll be the bluest one of the two. Don't kill her dead," he says. "Just yend her so she can't get away from you. Then she'll yell. Great Jupiter! how she'll yell!" he says.

"—Then you want to keep your eye peeled sharp, for it won't be long before 'tother 'un'll come tartin' along that way, from up yonder in the laurels, where he's layin' about this time, watchin' for a pheasant."

"—He'll hear them yell, o' her'n," says Uncle Jasper, and he'll tear down to see what's goin' on. Stand out good where he'll see you about the time he gets within a couple of rods of where 'tother 'un's a yellin' and spittin' and squallin', says Uncle Jasper. "When he sees you he'll stop and squat. Then you let him have it."

"—And be sure you kill him. If you

TO DETAIN FOOD IMPORTS.
Goods Arriving from Germany, France and Italy to Be Examined for Adulterations.

"Several cargoes of food products have arrived at eastern ports from Germany, France and Italy, suspected of being in violation of the new food act which went into effect July 1, and the collectors of customs at the ports of arrival are requested to hold the shipments until a chemical analysis can be made to ascertain whether all or any part of these cargoes can be admitted."

This is the substance of a letter received by the secretary of the treasury from the department of agriculture, and is the first step toward a test of the new law. Dr. Wiley, chief of the chemistry division of the agricultural department, has been engaged for months in making a careful analysis of all food products imported. He has carefully ascertained and noted the component parts of all commodities imported, and has prepared what may be termed the blacklist. Upon this list is a complete record of all commodities found deleterious to health, all that are forbidden to be sold in the country where produced, all which are restricted in sale in the countries in which made or from which exported, and all which are falsely labeled either in respect to place of manufacture or contents. These classes of goods under the new law may be excluded.

The suspected commodities mentioned in the letter from Secretary Wilson include canned goods, sausages, wines and liquors, olive oil and other food products. Instructions have been issued by the secretary of the treasury to the respective collectors of customs who have jurisdiction over the "cargoes" to detain them. The collectors will be required to forward at once to the secretary of agriculture samples of the goods. The "cargoes" that have been held are upon the agricultural department's blacklist, and Secretary Wilson, from the advice received from sources abroad, has reason to believe the entries must be excluded.

don't mebbe you'll be sorry you went down after 'em. So be sure you kill him."

"Then," says Uncle Jasper, "you'll settle 'tother 'un," he says, "and you'll have 'em both, and I am glad you come along," he says, "but you won't get 'em both if you don't act right, for they ain't together!"

"—Only a couple," says he.

"—Lemme see," says he. "This is along in November, he says."

"—Thea he looked around at the weather, and seemed to be considerin' the matter, how they was fallin', and then he says:

"—Well, Dan'l, he says, 'I see by the way things look that there's a couple of wildcats down back of the swamp yonder,' he says, 'and I'm glad you come along,' he says, 'cause I wouldn't 'a' thought nothin' about wildcats if you hadn't come along,' he says, 'and then two wild cats 'a' been up here and played hob with my chickens to-night, sure!' he says, 'I wish you'd go down and get 'em,' he says, 'but you won't get 'em both if you don't act right, for they ain't together!'

"—Who don't just yend the big tamarack first," he says. "There, in one of them tamaracks, or high it, you'll run agin one of them wildcats," he says.

"—It'll be the bluest one of the two. Don't kill her dead," he says. "Just yend her so she can't get away from you. Then she'll yell. Great Jupiter! how she'll yell!" he says.

"—Then you want to keep your eye peeled sharp, for it won't be long before 'tother 'un'll come tartin' along that way, from up yonder in the laurels, where he's layin' about this time, watchin' for a pheasant."

"—He'll hear them yell, o' her'n," says Uncle Jasper, and he'll tear down to see what's goin' on. Stand out good where he'll see you about the time he gets within a couple of rods of where 'tother 'un's a yellin' and spittin' and squallin', says Uncle Jasper. "When he sees you he'll stop and squat. Then you let him have it."

"—And be sure you kill him. If you

NEW FIND MADE IN ROME.
The Foundation of the Temple of Janus Held Here by the Forum Excavations.

Important finds have just been made in the Roman Forum. The foundations of the temple of Janus have been discovered close to the temple of the Caesars.

Discoveries have also been made of subterranean passages and rooms with theatrical machinery from which the gladiators evidently issued on the amphitheater above. This is probably the earliest amphitheater in Rome, which is recorded in the classics and antedated the Colosseum.

Sirnor Boni, the indefatigable director of excavations, hopes to make other important finds.

RATS ATTEND THEATERS.
Debris from Their Holes the Rodents Invade Playhouse and Amusement Resorts in Paris.

Statistics estimate that there are 40,000,000 rats in France. The tunneling for the Metropolitan railroad has made them much in evidence.

Being apparently driven from their holes, they have taken to attending the theaters. At the free matinee performance recently a dozen rats scurried across the stage, and the audience, at the Fort St. Martin theater several women fainted, while the employees drove out the rats, which some persons in the audience declared afterward were as big as cats.

Strikes Something Hard.
Having run over and bumped into everybody else with impunity, the devil wagon is naturally somewhat disconcerted at the result of its collision with Judge Tukey, says the Chicago Chronicle.

ACCURACY SAVES MONEY.
Government Bureau of Standards at Washington Does an Important Work.

At the bureau of standards they think nothing of measuring the weight of the prime from your thumb which you may place on a clean sheet of paper. They weigh the sheet before the thumb is applied and thereafter. Likewise they will measure the width of a human hair, if you want them to; they will tell you how much the heat of your body expands the delicate mechanism of the watch in your pocket, says the New York Sun.

Their work is intensely practical, though. Hundreds of surveyors' chains come to the bureau to be tested. Many have been used for years under the impression that they are absolutely accurate. At the bureau they are found to vary from the standard from an inch to half a foot.

How important the accuracy of the surveyor's chain is was demonstrated recently in Philadelphia, where an entire subdivision was thrown into court on the very point of accuracy of surveying. The variations of the chain used by the different surveyors was not more than three inches, but this was sufficient in the large subdivision to bring hundreds of square feet of valuable property into question.

In Brooklyn there was a long standing dispute growing out of the same condition. For years owners of adjoining pieces of property battled in the courts over the possession of 11 inches of ground which an inadequate survey had left outside the boundaries.

The bureau credits itself with a recent saving of \$20,000 to Uncle Sam. The gunmaker had heated one of the great steel gun castings to the degree which was believed to be just right for shrinking on the jacket. The bureau of standards' instrument was used and it was found that the temperature was off several degrees—sufficient to have spoiled the gun when the jacket cooled. The damage to the gun would have cost the government just \$20,000.

Recently, in Baltimore, a milk dealer was charged with not giving full measure to his customers. He contended that his measures were correct and resisted payment of a fine. The chief of the bureau of standards discovered that the milk dealer and not the city had the correct standard.

In the capital, not many months ago, there was a controversy between the vendors of milk and the authorities as to the size of milk bottles. One dealer was even ready to make a hero of himself by going to jail. An appeal to the bureau of standards settled the whole controversy.

Recent tests of the electric light furnished to one of the eastern cities showed that the candle power was short about one-fourth of that called for by contract. The annual expenditure of the city is \$2,000,000 and the tests of the bureau thus showed that the power furnished is short in valuation \$500,000 a year.

The uses of the bureau just given are really the minor ones from the standpoint of the bureau officials. It is especially for the more complicated work that new laboratories are about to be provided for the bureau at a cost of a quarter of a million of dollars.

To make exact measurements the buildings of the bureau must be of special design, and perhaps the most elaborate system of heating, ventilating and refrigeration ever known will be installed. There is a balance in the possession of the bureau so delicate in its poise that the heat of the body alone affects it, although it is tightly encased in plate glass. No one is permitted to come within 15 feet of it.

When something is to be weighed, it is placed on one of the pans of the balance. The case is closed and 24 hours are allowed to pass in which the weights, balance and object, reach the normal temperature inside the case and the air which was disturbed resumes its equilibrium.

The manipulation of the balance is done by means of long bars, which extend 15 feet from the balance. Even after these precautions are taken a dozen different calculations are made to correct known variations in the apparatus.

The international bureau of standards, which has headquarters at Paris, has furnished to this government a standard meter and standard kilogram. The standard meter has never been touched by human hands since it reached its present degree of perfection. It rests in a glass case in a vault. The comparisons with it are made through the use of microscopes. The standard kilogram is of platinum-iridium. The metal in it cost about \$7,600.

What Nerve.
Taddies—I used to think a good deal of straddles, but—
Waddies—You don't say so? What has he done?
"The other day I asked him to call round and give me his opinion of an article of mine on 'The Impending Crisis'." Well, he came, all right; but he brought a little thing of his own for me to hear, and confound him, he wasted all the evening with his egotistical trash."—London Tit-Bits.

Effect of Sunspots.
It is only in tropical stations, according to Charles Nordmann, that any effect of the sunspot period upon mean annual temperature can be detected. From the records of 13 such stations it appears that the annual temperature varies with the sunspots, and that the coldest years are those of maximum sunspots.—Science.

Not Treasure of Egypt.
Algiers has its Pompeii—the ruined city of Timgat, in which a number of art treasures have recently been found. They will be added to the Louvre collections in Paris.—London News.

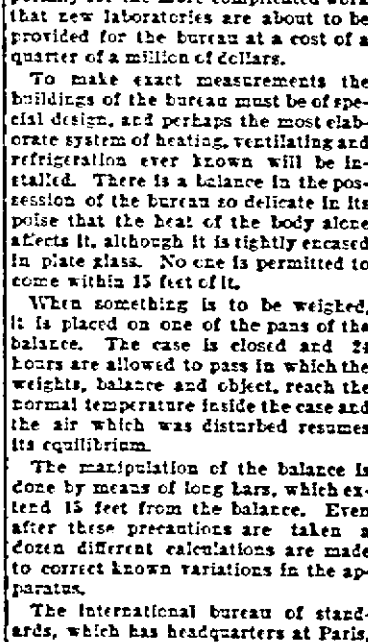

Largest Can Factory.
Probably the largest can factory in the world is that of the Standard Oil company at Long Island City, at which 70,000 five-gallon cans are made from Welsh tin each day for the export kerosene trade. Three men have made 21,000 cans in one day.

Know It a Century Ago.
Attention has been called to the fact that Smollett, when he wrote "Roderick Random" in 1749, was aware that consumption is infectious and that blankets and mattresses are a source of danger.

Art in Architecture
Designed and Written Especially for this Paper

HERE is a cottage containing five rooms, which can be erected for a very small sum of money, considering the amount of conveniences contained. In building a cheap house, and one that shall be comfortable and convenient, the dimensions of the rooms must necessarily be a fair amount of floor space, and presents an attractive exterior. A house may be simple enough to be cheap, yet with the parts well proportioned, all together an attractive feature of the surrounding landscape.

This design is especially adapted to an inside lot and shows an exterior

USEFUL CHINESE BUGS.
They Feed on the San Jose Scale and Are Expected to Save Millions for Fruit Growers.

More bugs are being hatched daily at the department of agriculture at Washington than were ever before stimulated by human enterprise.

The insects chosen for propagation—a dozen of them, which were imported alive from China more than a year ago—were so precious that a single specimen could not be bought for \$100.

This will be better understood when it is explained that this batch of bug with their progeny bid fair to rid the United States of a pest which at the present time is causing a loss of \$10,000,000 a year.

The pest is the San Jose scale—originally brought from China or Hawaii to California, which has spread over a large portion of the fruit-growing regions of the United States, and threatens to wipe out the horticultural industry.

Once it gets a foothold in an orchard it sweeps through the latter as destructively as fire. Its rate of propagation is something fabulous, under favorable conditions, and the twigs and branches it attacks are quickly covered with a sort of gray scurf consisting of the waste excretions of an incalculable multitude of microscopic insects.

By good luck Mr. Marlatt, one of Uncle Sam's most skilled entomologists, happened to be traveling in northern China about 18 months back and found there this very plague. But the mischief, though obvious enough, was not specially destructive because of a peculiar insect much resembling a minute hedgehog.

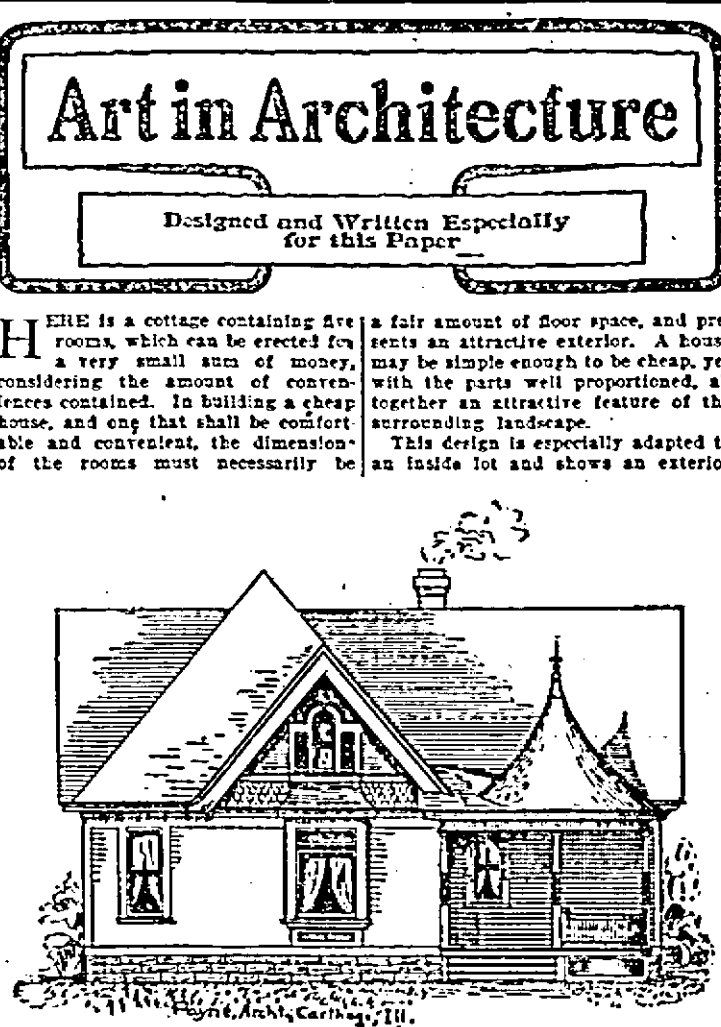

It seemed evident that this was the enemy provided by nature for keeping down the scale insect, and Mr. Marlatt promptly proceeded to capture a few hundred specimens, which he brought to this country in tin boxes.

Nearly all of them died on the way, but on reaching Washington the dozen hardy ones that survived were put into a wire net cage outdoors, being placed upon the branches of a pear tree that was thoroughly infested with the scale insects. Without a minute's delay the Chinese bugs went to work preying upon the scale insects, and what was more important, they proceeded to multiply their own kind rapidly.

Pretty soon a second cage containing another fruit had to be built to receive the overflow and to-day there are more than a dozen similar cages.—Philadelphia Press.

What We May Expect.
Foreigner—What means this great procession of bicyclists?
Citizen—That is the new Army of Peace going to Washington to demand that congress abolish all tack factories and root up all bushes that bear thorns.—N. Y. Weekly.

Two Ever There.
"The world is backward about coming forward with its appreciation," mused the Irish philosopher. "We never think of strewing flowers on a man's grave until after he is dead."—Chicago Daily News.

small, as every square foot of space added to the ground plan of a structure increases the quantity of materials that go into the building and that is certainly pleasing to the eye in its architectural composition, and the practicality of its construction and the usefulness of its features must appeal strongly to those who wish to have their home not only of a pleasing exterior, but also wish to obtain this end without any very great additional expense. The cottage is, of course, designed for a small family. Its exterior appearance is in keeping with the surroundings and will look well in any good situation. Its size is 35 x 25 feet. The story is ten feet in height. The foundation is of brick, and a cellar is provided under a portion of the building six and one-half feet deep. The outside walls are sided and the roof is shingled. The interior is trimmed with natural finished cypress and pine. A nice china closet from floor to ceiling is located between the dining room and the kitchen, and has doors opening on both sides. There is a bathroom near the kitchen, to be fitted up as desired. The pantry is well arranged for convenience. The cost of this cottage in most localities would be from \$500 to \$600.

E. A. PAYNE.

AUTOMATIC TOMCAT.
Unique Invention of a London Gentleman Clears the British Metropolis of Pests.

Probably nowhere is a peace-loving community more annoyed or nights by phantoms of cats on every roof and back wall than is the population of London. Just now, for the first time, a genius has risen with what appears to be a successful remedy for the evil. It consists of nothing less than the invention of a fearsome automaton tomcat made up of a tin frame and covered with a fur coat.

"Tom" is as black as the darkest night, with a stiff black tail standing up defiantly in the air, and a ghastly look in its sightless eyes. This baneful glare is produced by a four-volt electric battery stowed away in that portion of "Tom's" anatomy generally occupied by the digestive organs.

The general principle of construction, according to the British inventor, is based upon powerful clockwork, released by a lever when the tail of the animal is moved. The clock works a pair of bellows, with two loud screeching reeds, at the same time forming contact with light the lamps in the eyes and forcing outwards a dozen long needle points, which come up through the skin of the back. The tail also acts as a trigger and releases a hammer formed of the lower jaw of the cat, which explodes two percussion caps in the mouth.

One night recently an experiment was made. The clockwork was wound up and the beast placed in the back garden. In due course of time a ferocious tom cat, with chips off its ears, walked up to the stranger to give battle, while a dozen of his lady friends sat around to see the fun.

Without the slightest provocation he flew at the automaton cat, removed a lamp of loose hair from his back, and broke his tail in half. That ended the first round, but it was only the signal for the tin tom cat to get into action.

The tail exploded the percussion caps in that cat's mouth with a sound resembling that of a small cannon, the electric eyes blazed out like searchlights, while heart-rending shrieks rent the air from the bellows inside, and the needle points got their business ends into the tom cat.

Within a few seconds the garden was clear and pale-faced pussies were tearing off through the quiet streets in search of home comforts. It was more than a month before they ventured to peep over the wall to see if the "black terror" was still in possession of the place.

The Job for Him.
Little Johnny—When I grow up I'm going to be a diplomat.
Sunday School Teacher—Why not be a preacher, like your handsome uncle? Little Johnny—Cause pa says preachers goes to hell if they lie, but diplomats gets promoted.—Chicago Record-Herald.

As Heavens.
Mifflins—How hard it is that his word is as good as his note.
Bifflins—He probably means that his note isn't worth any more than a word.—Chicago Daily News.

FREE PROOF FORBIDS DOUBT.

Great, Pa., August 1, 1903.—I received your sample of Doan's Kidney Pills and have taken to heart and am gratified by their good effects. I have recommended to be: When I began taking them I could not walk a step without my back aching and I was unable to do any work. Now I can walk and do any work I wish. I have taken a box of Doan's Kidney Pills and have taken them to heart and am gratified by their good effects. I have recommended to be: When I began taking them I could not walk a step without my back aching and I was unable to do any work. Now I can walk and do any work I wish. I have taken a box of Doan's Kidney Pills and have taken them to heart and am gratified by their good effects. I have recommended to be: When I began taking them I could not walk a step without my back aching and I was unable to do any work. Now I can walk and do any work I wish. I have taken a box of Doan's Kidney Pills and have taken them to heart and am gratified by their good effects. CALUMET

Baking Powder

It's enough to drive any one on the war path—impure baking powder.

Food prepared with Calumet Baking Powder is pure and healthful, free from Rochelle salts, lime, alum and ammonia.

GOING IN TO DINNER.

How the Methodists differ in France, England and America.

In France they walk into the dining room, the lady and her maid, the two chairs, equal one to the other. In England John Bull goes first, the following neck and collar. In America Mrs. Jonathan enters triumphantly, leading the way, while her dear old house follows.

In France men and women walk with equal assurance. When they meet on the street the men pay their respects to the women and the latter show their deference to the men by the way in which they salute one another. Your natural conclusion is that such men and women go through life on the same equal footing.

On the contrary, John Bull has the air of a lord of creation. He leads the way a little haughtily, and most unpleasant looking. He is only sensible of the fact that he is a master—the master. He is of course polite and deferential to women, but it is with a slightly patronizing air, a condescension of his lofty lordship. He feels his supposed superiority, and he cannot help showing it. Amongst themselves and lower class people the man's master and enters his house before his wife, mother or daughter.

In the United States the woman walks like a duchess. She is mistress of all she surveys. She stands erect and queenly, and her eyes are frank. For her, man exists. He pays her court. She is indeed a queen.—American Queen.

The Price of Slaves.

The prices of slaves varied very greatly in different parts of the south in antebellum days. In states like South Carolina or Louisiana, where slaves were always in demand, the price was paid for them than in the border states like Kentucky and Missouri, where they could easily be run away. In New Orleans \$1,500 to \$2,500 was often paid for a good carpenter or blacksmith, who in Kentucky or Missouri would not have brought more than half as much. Many slave traders made a regular business of offering in the border states and selling in the border states and Charleston, and there was always a handsome profit in the transaction. The most risky part of the business was the guarantee demanded that the slave would not run away. The time limit was commonly thirty days, and the matter was usually arranged with the slave himself by taking his promise and giving him \$5 or \$10 to stay until the guarantee had expired.—Baltimore.

Judged by His Voice.

One day Sir Algernon West, a well known member of parliament from London, was observed by one of the doorkeepers talking to a gentleman who had a rasping, raucous voice and a demonstrative, excited manner. While the conversation was in progress Sir Algernon received the card of another member of parliament and an intimation that his owner wished to see him. "Sorry, I'm engaged," was the answer. Next moment up came another card from a well known peer. Again an apology was returned. In another minute the doorkeeper came carrying a huge card and saying that the lord mayor and sheriffs of London wished very urgently to see Sir Algernon. The latter excused himself from the gentleman with whom he was conversing. This was too important to resist. "There ain't nobody here," whispered the doorkeeper when he got to the member outside, "only I was afraid a man had been shown in to you by mistake, and I wanted to warn you."

The Parson's Idea.

"Parson," said the colored brother, "don't you think dat by dis time de place what Satan live at oder be clock full?"

"Well," replied the parson, "ordinarily all human calculations lit oder be, but you kin depend on one thing."

"En what's dat?"

"Satan ain't gonna let you fool him in de real estate business on nobody's de outlying road kin's nifty dey's one since he's in de world!"—Atlanta Constitution.

A Water Moccasin.

"I never could understand," began the cheerful fellow, who had just been listening to a dissertation on poisonous snakes.

"Never could understand what?" put in the other.

"I never could fully understand why a rubber shoe wasn't entitled to be called a water moccasin!"—Baltimore American.

Our Father.

"It's funny our father never gets married," remarked the young husband, who had just refused his wife a bonus in his endeavor to change the subject. "I think he'd make a good husband."

"Well," replied the wife warmly, "he didn't seem to make a very good one when he married me."

The only way to get a degree from the colleges without earning it is to become a great man without their help.—Baltimore American.

LIFE BY THE CLOCK.

Doing Things on Time May Be Carried to Dangerous Extremes.

An eminent physician at a recent gathering of his profession directed notice to the daily tension under which most Americans do their work. We rise on time, he remarked. In the morning, whether by an alarm clock, by the call of a servant or by habit, at breakfast and read the paper on time, a clock in every room and a watch frequently in our hand. We then, on time, meet office and outside engagements, always preponderating the amount of time that will be required and timing the next engagement accordingly. Often we subdivide this time and note by our watches exactly how long we can discuss a subject.

Without punctuality is a virtue. Without also the practice of doing things exactly on time has been for us as a people a large measure of industrial success. But, carried to an extreme, as it often is, it is wearisome to the individual. The people whose nerves break down from exhaustion incident to overwork are often not so much the victims of overwork as the habit of compressing every bit of work within prearranged limits of time. Let any one try the experiment of doing a given piece of work steadily and with application, but without noticing by his watch or clock how much time he is consuming, and he will be amazed to find how much easier it will go than when he is timing himself and scheming to bring the prescribed task within a fixed number of minutes.

We know a great deal more about sanitary matters than our fathers and grandfathers knew. We have located down microbes. We have located down diseases which were once regarded as visitations of Providence we now know to be preventable, and we take suitable means of preventing them. All these discoveries and new remedies ought to diminish the death rate and to promote longevity. They have not done so, as a matter of fact. Perhaps they might do so if they had a fair chance. The trouble is that along with these devices for lengthening life we are adopting practices which tend to shorten it. One of the most wearing of these is the habit of timing all details of our work within exact time limits.—Boston Transcript.

SCIENCE SIFTINGS.

The chemical forces are nearer akin to the vital forces than to the physical forces.

A body weighing one pound on earth would weigh twenty-seven and a half pounds upon the sun.

The mechanical force of the sound emitted from 500,000 to 10,000,000 cornets would equal but one horse power.

The highest speed which matter has been known to reach is that attained by the eruption of hydrogen and other gases from the sun, which is at times several hundred miles a second.

The star Sirius, which is shown to be about double the size of our sun, emits from forty to sixty fold more light than the sun owing to its matter being much more diffused.

Two hundred and eighty stars north of 20 declination have a velocity through space of twenty miles per second. The speed of our solar system is but 124 miles per second.

The most delicate scale is made by fusing one end of a fine thread of glass. The atom to be weighed is placed at the free end and the degree of the bending of the thread under its weight. This has to be done under a glass which magnifies a hundred times.

Plausible.

"What's the derivation of the word 'plausible'?"

"I give it up."

"But surely the word must mean something."

"Oh, I guess it was just faked up by some poet who needed a rhyme for 'knowledge'!"—Philadelphia Ledger.

Anticipation.

Mabel—Yes, dear, I will be a help to you and try to lighten the daily troubles and worries of your life as best I can.

Arthur—But I have none, darling.

Mabel—Oh, you old goose! I mean when we are married, of course!

What a Relief.

"Who's there?" called the poet.

"I am the wolf at the door," came the dire reply.

"Come in, come in!" cried the poet.

"I thought at first you might be a man with a will!"—Philadelphia Ledger.

An Exception.

"Do you believe," asked young Uncle Mch, who is only five feet tall, "that brevity is the soul of wit?"

"Not in your case," replied Miss Bif-fusion in a tone redolent with scorn.

Sympathy.

Miscellany—Our situation was so remote that for a whole year my wife never saw a white face but my own.

Sympathetic Young Woman—Oh, poor thing!

BOYS WANTED!

We want a boy in every town to work for us after school hours and on Saturdays.

Over 3000 boys now at the work. Some make \$10.00 to \$15.00 a week.

ANY BOY

who is willing to devote a few hours each week to this work can earn many dollars selling

The Saturday Evening Post

Among neighbors and relatives. He can begin at once. Absolutely no money required to start. Write us today and we will send the first week's supply of ten copies free. These are sold at 5 cents each, and will provide capital to order the next week's supply at wholesale rates.

\$225 in Extra Cash Prizes Next Month

Booklet containing photographs of some of our most successful boy agents, with letters telling how they work, sent free.

A FREAK OF NATURE.

Wonderful Traveller Sand Hills That Are Found in India.

After passing another "town" of three or four mud huts, we enter the famous desert of India, on which are what I consider the most remarkable natural curiosities to be seen on this globe. For we are now among hundreds—say, thousands—of pure white sand dunes on a plateau of 4500 feet above the level of the sea and fifty-four miles from the coast, where all else is of a dark red or chocolate color. Whence comes this sand and why always in a crescent shape? Professor Bailey told me that scientific men do not agree as to the reason why the sand always forms the same crescent shape, although it is generally believed that the whirling eddies of the wind are responsible. Some, however, argue that such is not the case since even of these crescents has an opening toward the northeast. At any rate, the inner circle is an almost perpendicular wall of the finest pure white sand, and from the upper edges the crescents slope gradually away on the outside. They average about twenty feet in height, the inner circle having a diameter of some fifty feet, although I have seen one at least a mile and a half in diameter, which was, however, not much higher than the average. These crescents more, it is estimated, at the rate of three inches every twenty-four hours, and when on the slow journey one comes near the railroad it becomes necessary to shovel the sand across the tracks, after which it travels on, forming new crescents or widening with some of the others.—Ernest C. Root in Harper's Magazine.

Dwellers in the Ice.

The Eskimoes, or "Arctic Lightkeepers" of Ross, live in ice caves within the vast glacier cap which covers all northern Greenland. There is perhaps the most watched and isolated existence it is possible to imagine.

Their "dwellings" are always wet, owing to the melting of the ice walls and floor. For full six months of the year the darkness of the arctic night envelops them. The ice is around them, beneath them, above them. In some cases out of ten if they venture abroad they breathe the frozen particles, and the sensation is akin to that which comes from inhaling the blast of a furnace.

Nevertheless they refuse to move farther south with the approach of winter, as do all the other Eskimo tribes. They take a sort of perverted pride in their loneliness as in their misery. "What matter," they say, "if we are cold and hungry? We are the last of our people. We dwell literally at the end of the world. To the north of us there is snow, there is ice, but there is no land, and there is nothing that lives, breathes or has independent movement."—Pearson's.

As a Rule.

"As a rule, I do not find a book useful if it is finished," the elder Dumas used often to say. And certainly the pace at which he put his works on paper seems to bear out the statement. No fewer than sixty volumes of his appeared within a single year, a record probably never equaled before or since.

On one occasion he made a wager of \$100 that he would write the first volume of a new book he had planned within seventy-two hours, including the time for meals and sleep. The work was to occupy seven or five large folio pages, each page containing forty-five lines and each line fifty letters—a total of 3,375 lines. He won the bet with ridiculous ease, accomplishing the task in six hours less than the specified time.

Flowers That Harm the Sick.

Poisonous and others who have made a life study of flowers have recently discovered that the perfume of blossoms is often increased by growing them under enclosed glass. They state also that some plants are fragrant only at night and others only in the hot sunshine, and that the reason affects the colors and that some perfumes powerfully affect the human organization, sometimes giving rise to serious nervous troubles. Flowers of delicate perfume quiet the nerves of invalids, it is asserted, but the violet, lily of the valley and carnations are really harmful to the sick.

One of the most important things in the education of a boy is that he should learn to keep his lips together.

Life with the wolves, and you will learn to howl.—Spanish Proverb.
